

# tēmi center

**User Manual**  
( Updated 10.01.2022 )

# Login

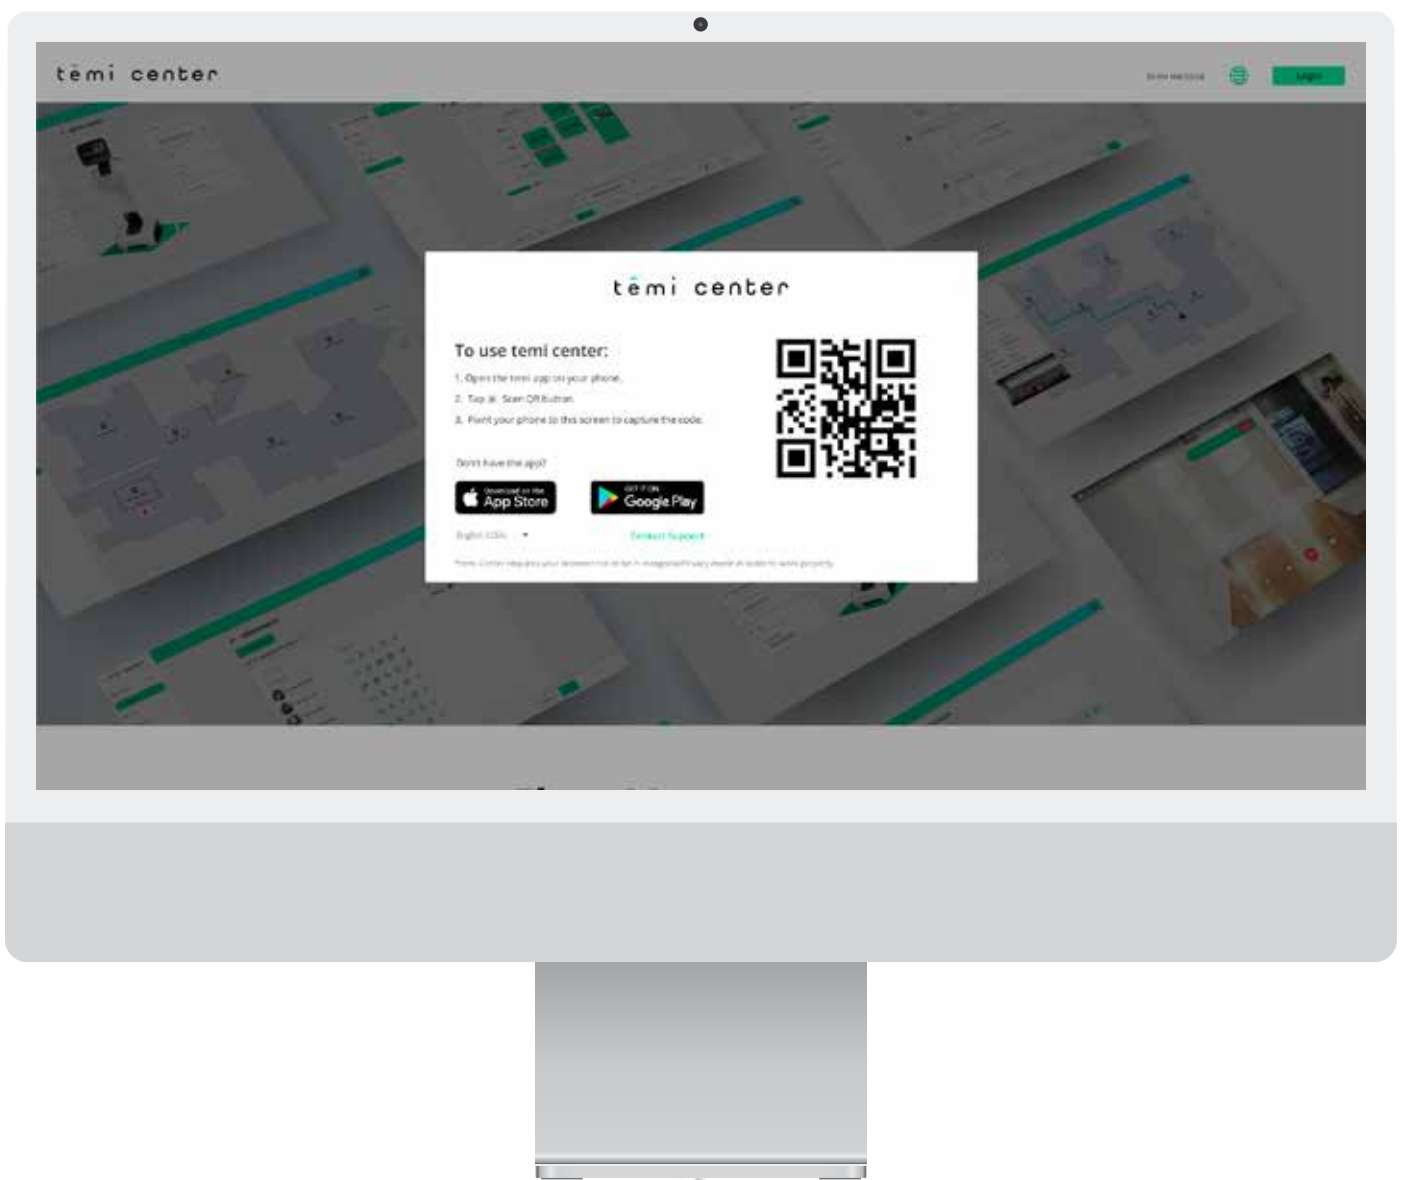

To log in to the temi Center go to - <https://center.robotemi.com/>.

You will need the latest version of the temi mobile app and for you temi to be on version 121 and above.

For IOS Devices [Click here](#)

For Android devices [Click Here](#)

On temi Center, click "Login". A QR code will appear on the screen. On your mobile app, if using an Android device, go to the main menu and select "temi center login". On your mobile app, select "Scan QR" on the bottom menu; This will open a scanner on the mobile app to scan the QR code that appears on the screen. Point your phone to the QR code to initiate login.

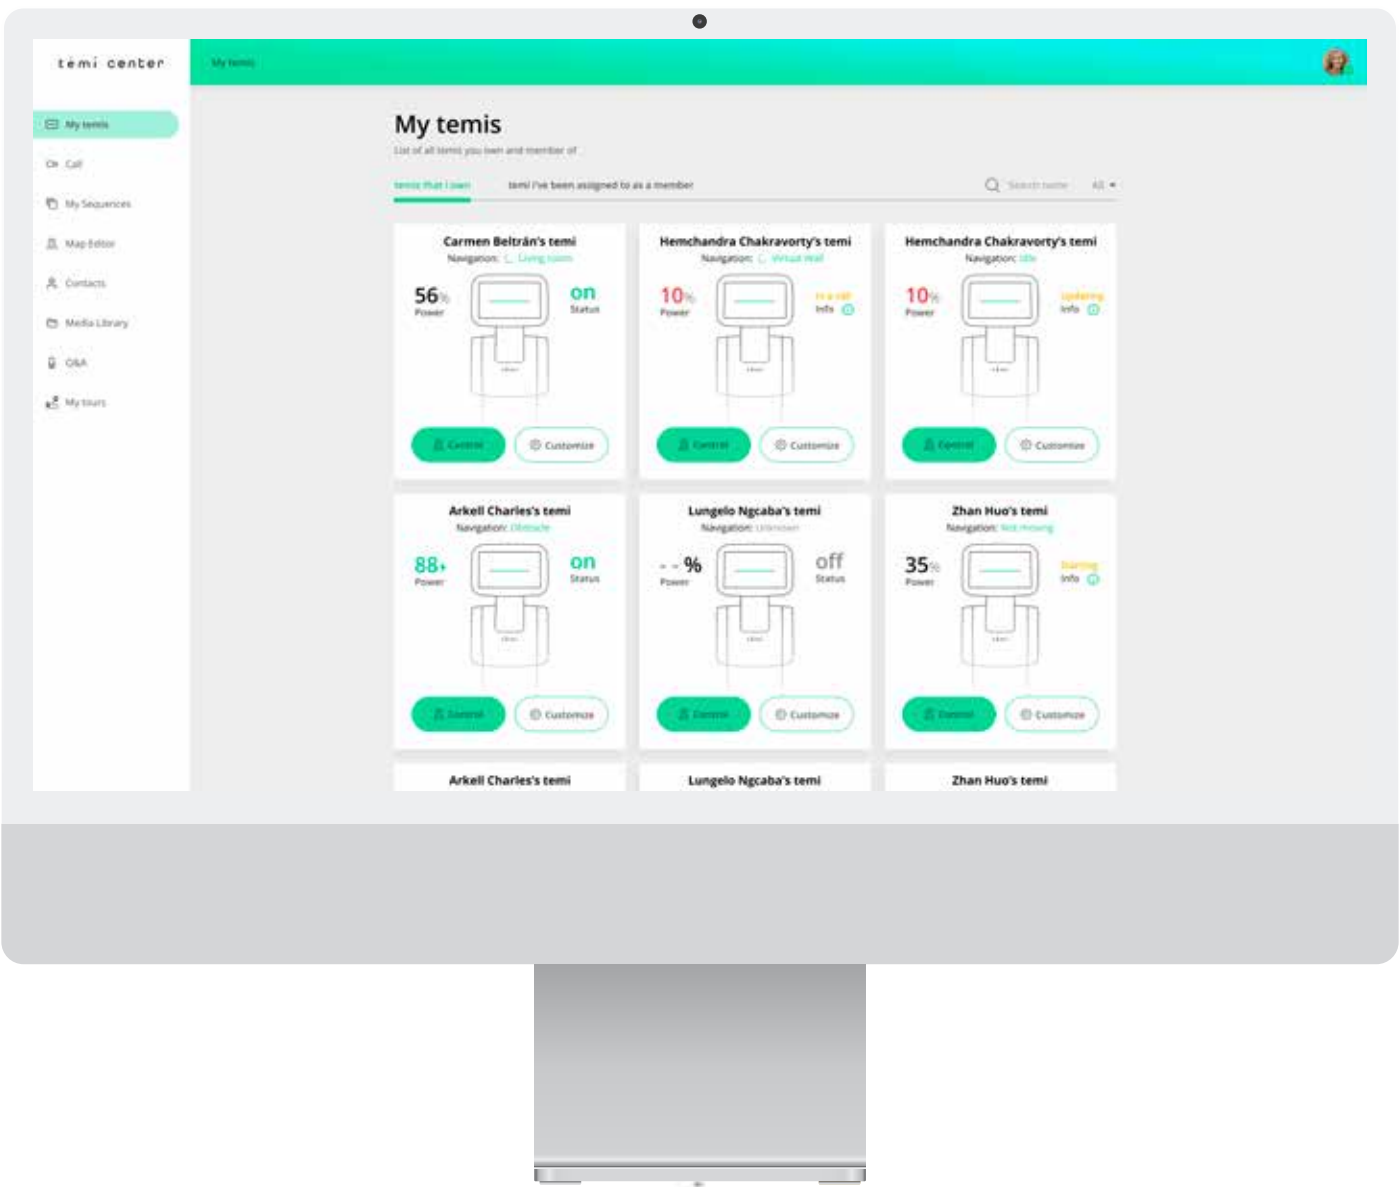

[Back to index](#)

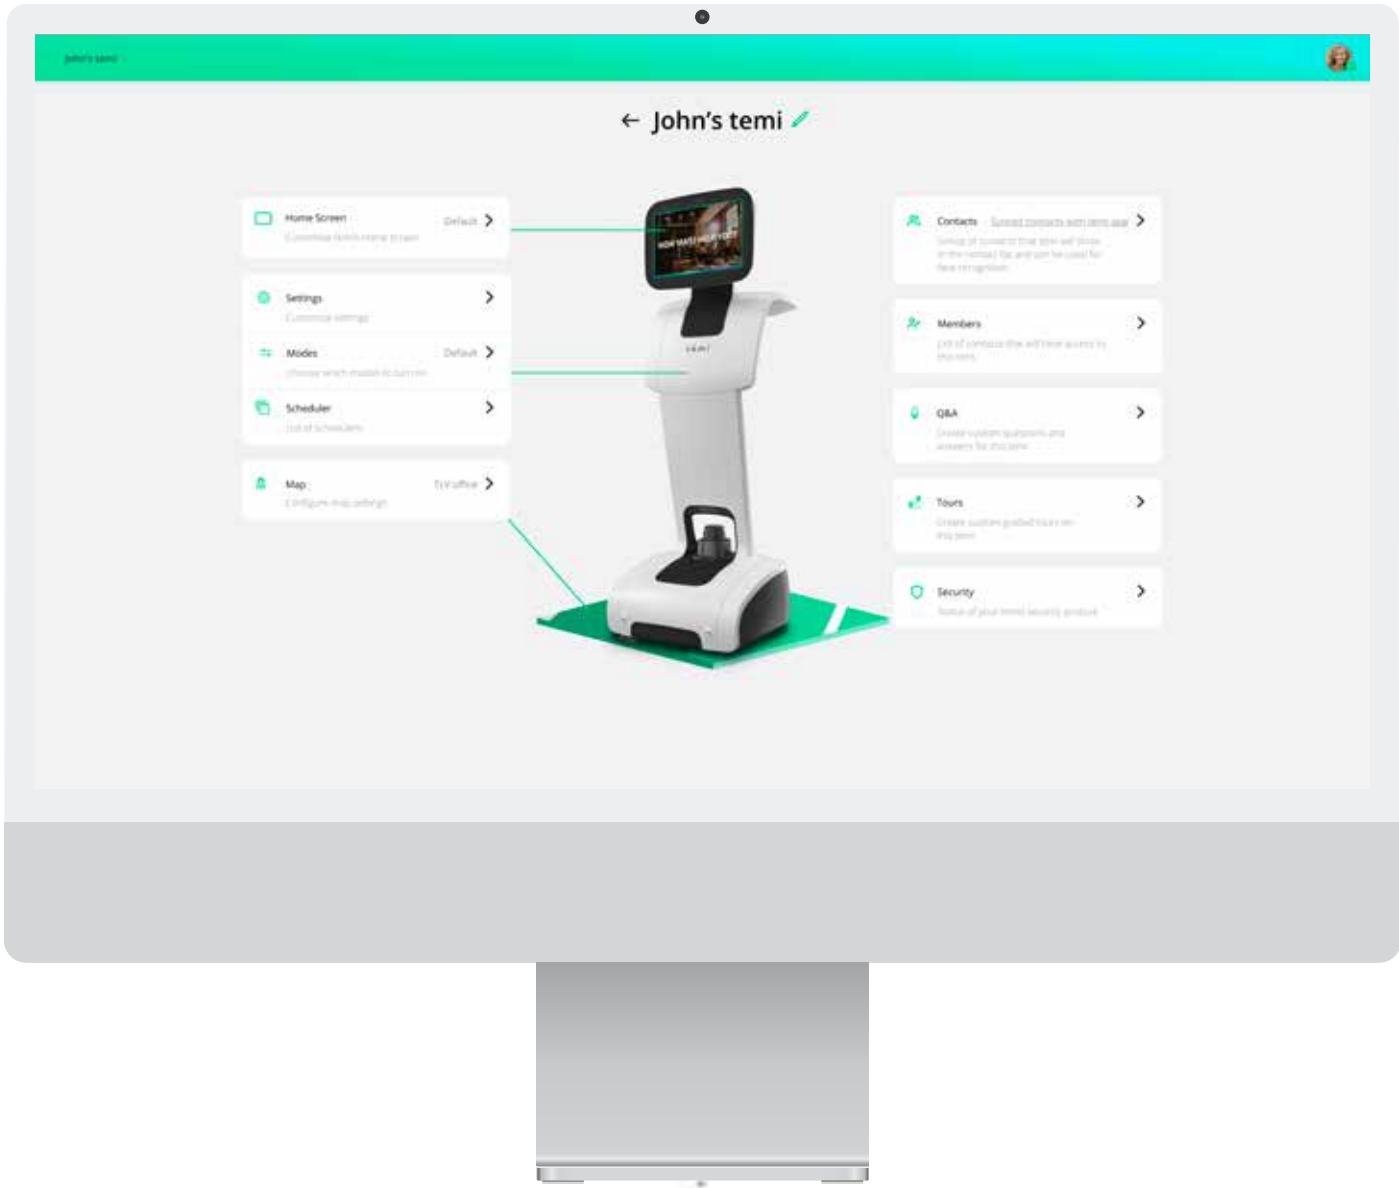

# Your temi

Under the “My temi” section, you can view all the robots you own and all the robots you are a member of, see their status and enter the control mode or the customization mode.

To switch between the views, select the tab “Robots that I own” or “Robot's I’ve been assigned to as a member”. You can also search robots by name and filter them by their status.

# Customize

## Map

Selecting this option will open the Map Editor (see further instructions in Section 4.2 below) search robots by name and filter them by their status.

## Contacts

- Click “Edit” to add or remove contacts
- Click “Delete” to erase all contacts from your robot

Additional Contacts settings can be found in the Contacts page (see further instructions in Section 5 below)

# Home Screen

Select what view of the Home Screen you would like to see.

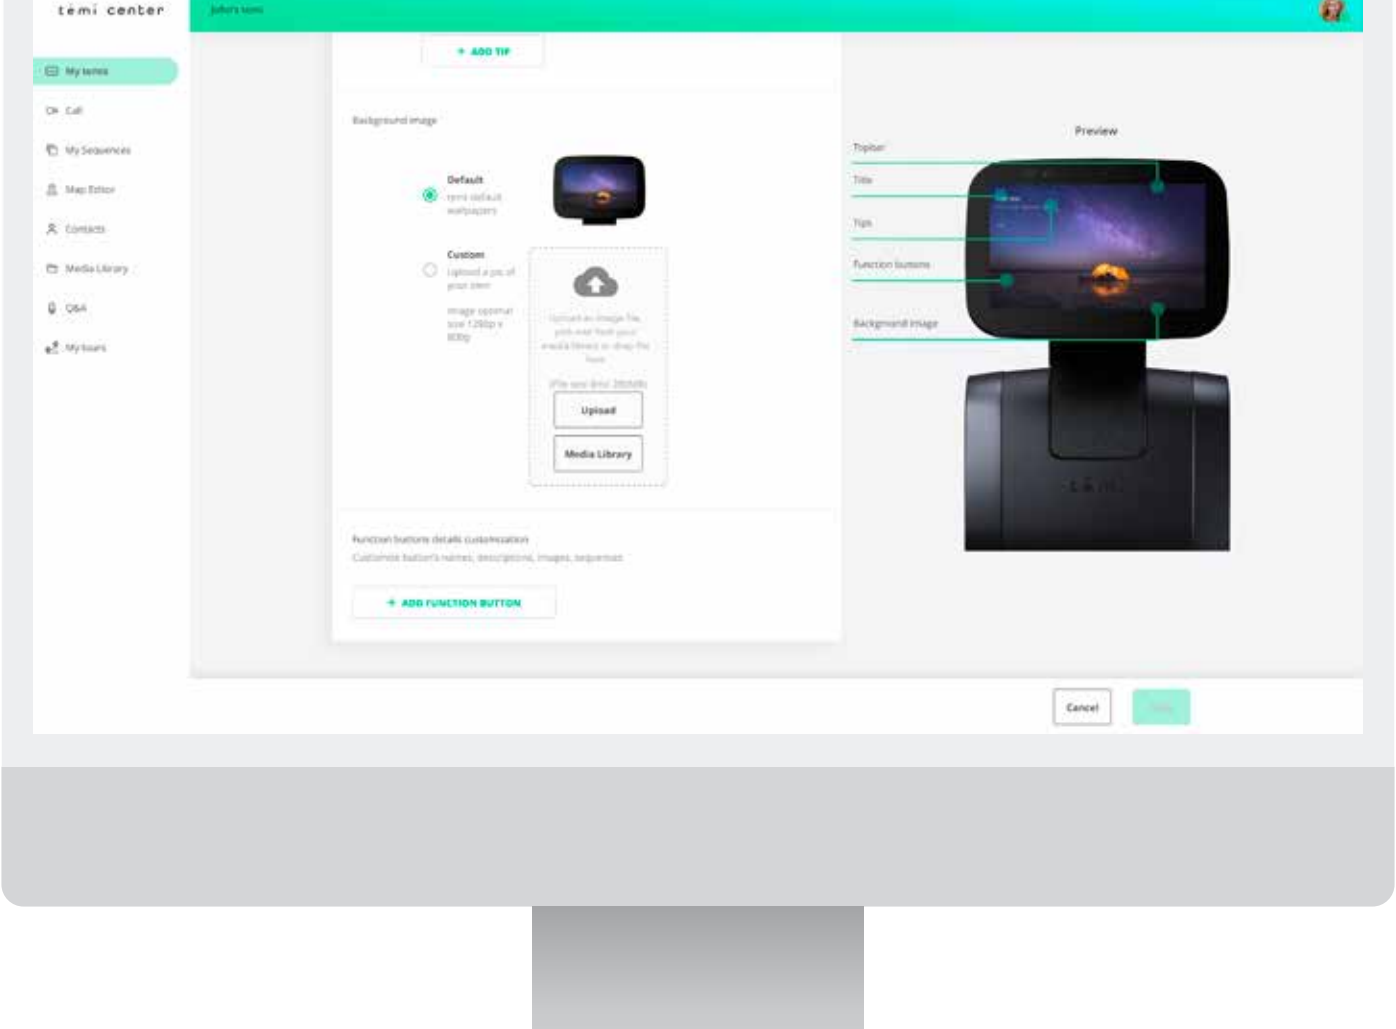

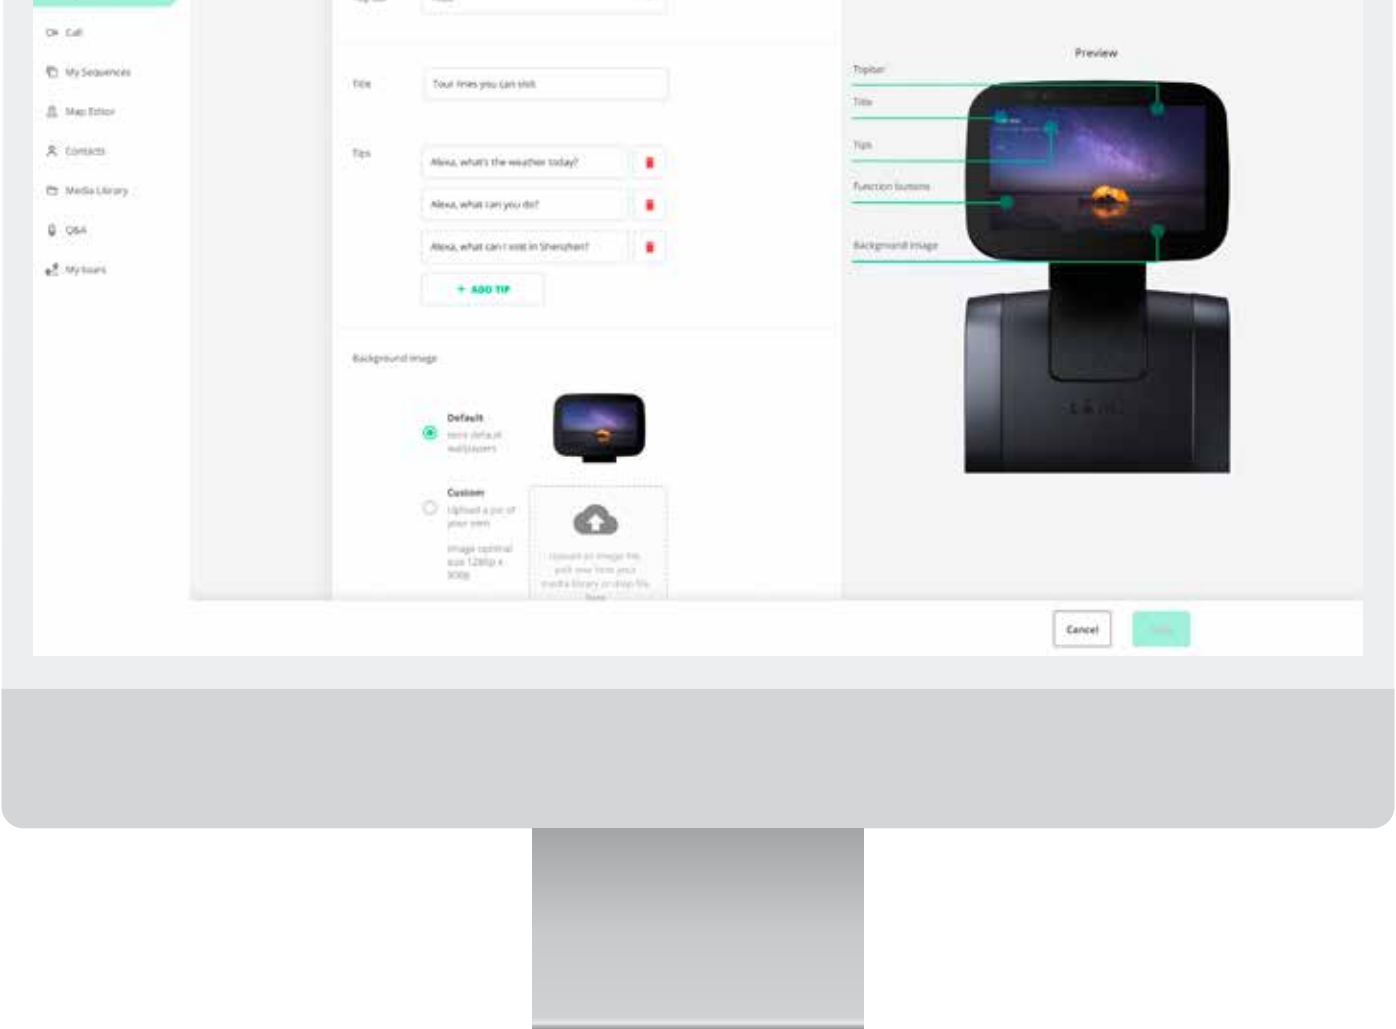

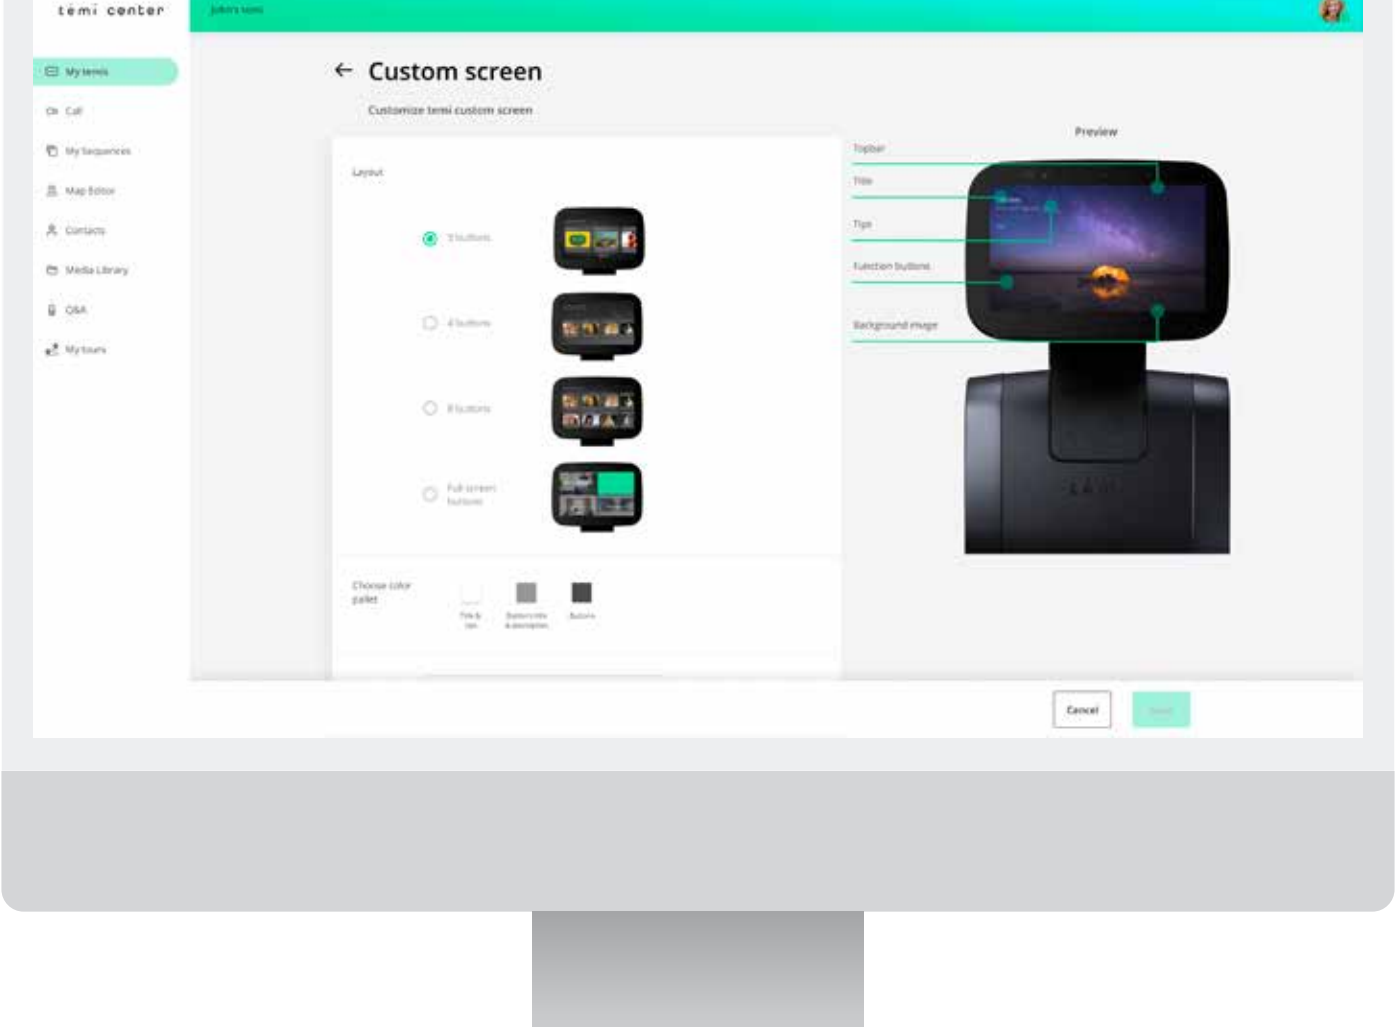

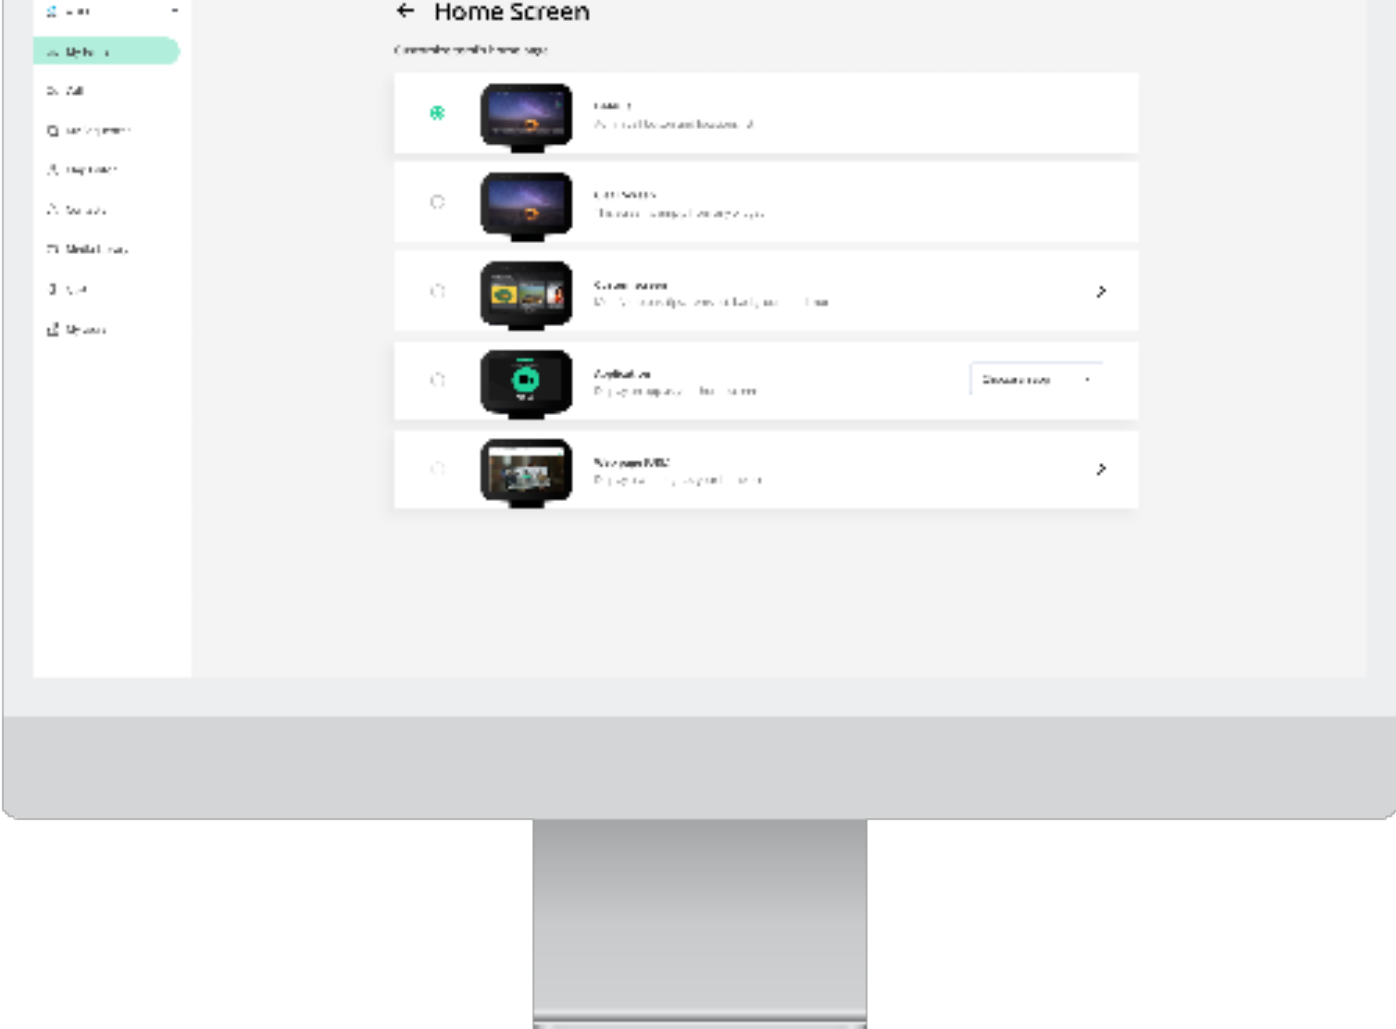

- a) Default – Admin call buttons and locations list will be shown.
- b) Clear Screen – Screen will be completely empty from any widget.
- c) Custom Screen – A customized screen with customized Function Buttons.

Application – Choose an App to be your home screen.

- If you wish to set an app as your home screen select the circle option on the left
- Select an app from the drop-down list on the right

## Web Page (URL) NEW

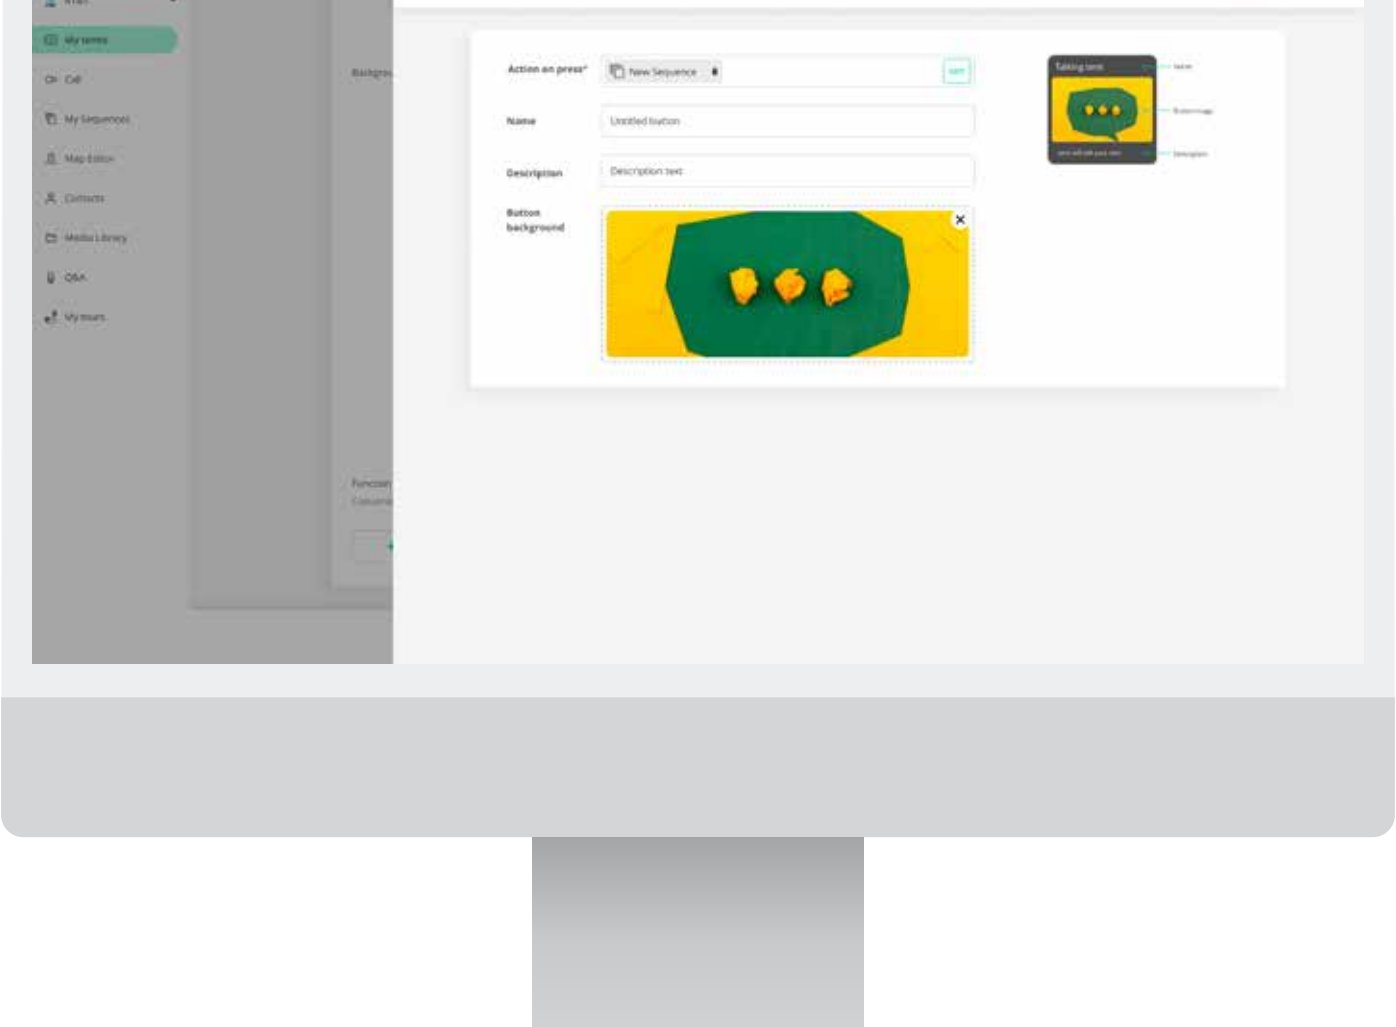

- If you wish to set a Website as your home screen select the circle option on the left
  - To input the website you wish to launch, you can do so by selecting “Web Page URL”,tapping the arrow on the right
1. Input a URL address – Type any website of your choice
  2. Browser navigation bar - Select whether you would like the browser navigation bar to be Shown or Hidden immersive
  3. Original Web page - Select ON or OFF. By choosing ON whenever the user ends the interaction, the page will return to the original web page URL. By Choosing OFF, when the user ends the interaction, the page will remain in the last visited web page

- If you wish to customize your Home Screen, you can do so by selecting “Custom screen”, tapping the arrow on the right.
- Layout – Select from 4 different options how many buttons you wish your temi to display. (3,4,8 or Fullscreen buttons)
- Color Palette – Choose from the color palette which colors you wish the titles & tips, button's title & description, and main buttons to display.
- Top Bar – Select whether you would like the Top Bar to be hidden, shown or immersive.
- Title – Enter a title name that will appear on your home screen.
- Tip – Add a line of text
- Background image – Select Default or Add a custom image that will appear in the background

# Add Function Buttons

- a) Add a sequence(s) or launch an App as the Home Screen.
- b) Name – Add a line of text to distinguish the Function Button
- c) Description – Add a line of text describing the Button
- d) Upload & Media Library – Upload an Image file or choose from the media library

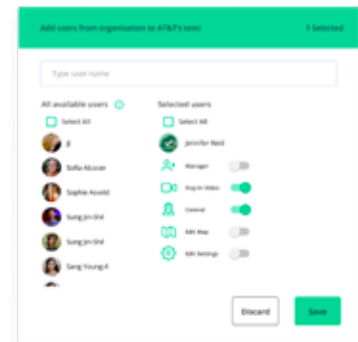

[Back to index](#)

# Members

Select this option to view existing members of the robot, add new members and assign member permissions

1. Add New Members:

To add a new member, select “Add Member”

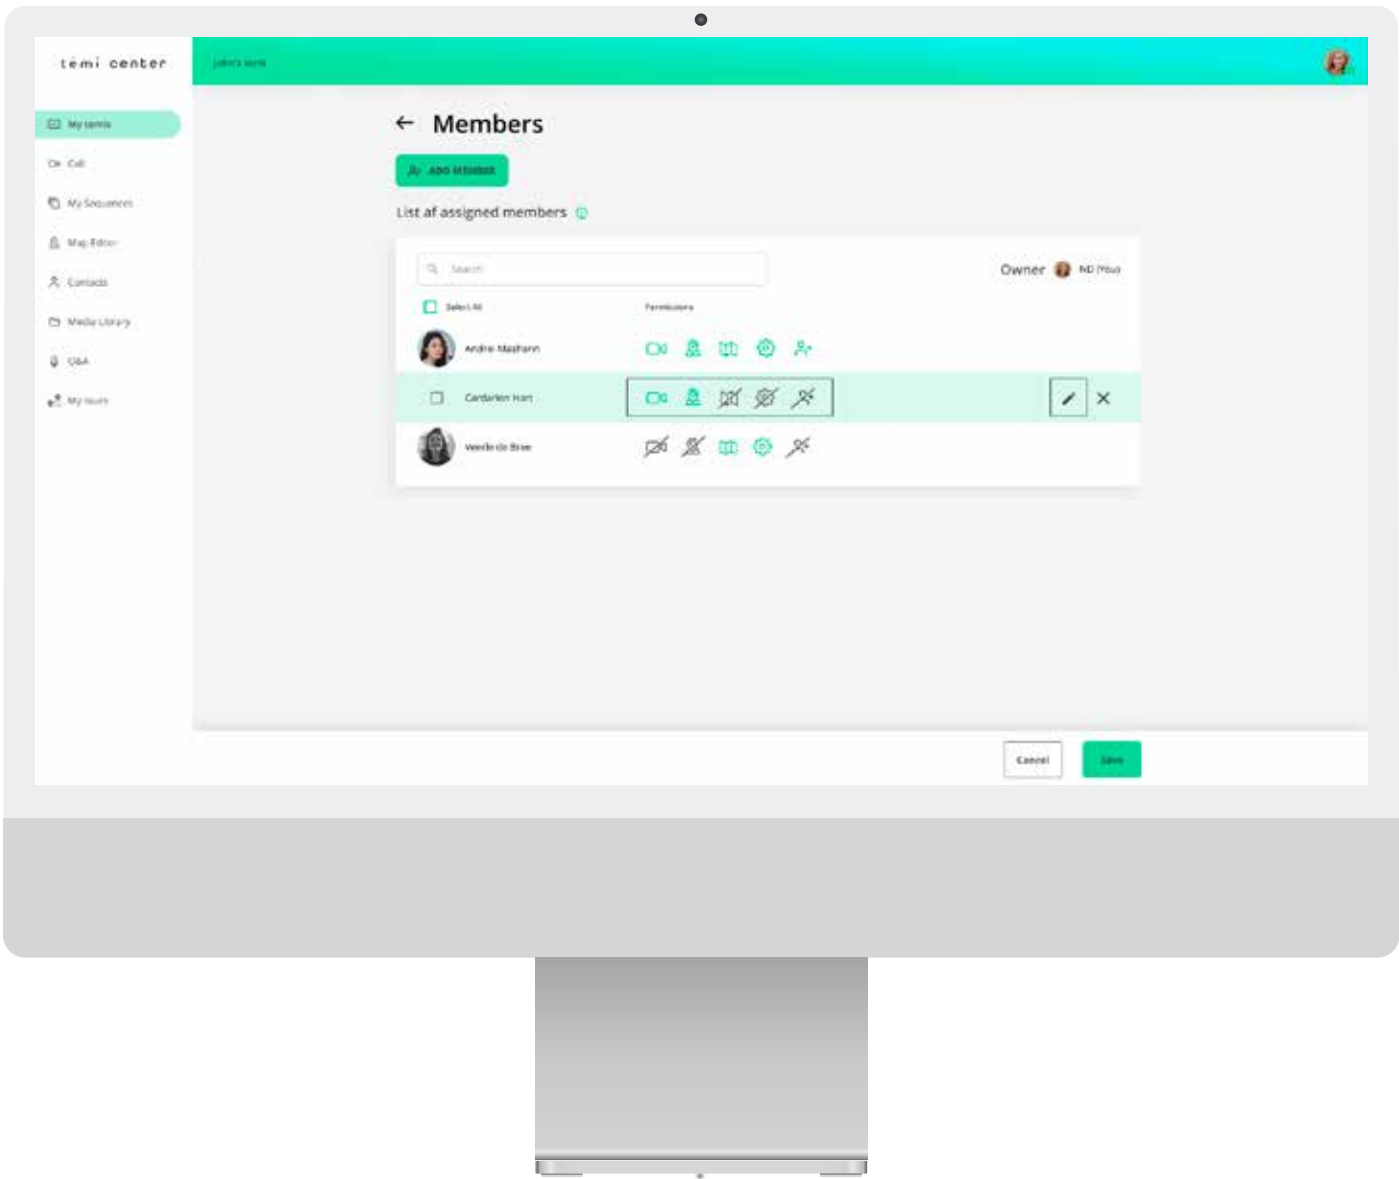

2. Set Up Member Permissions

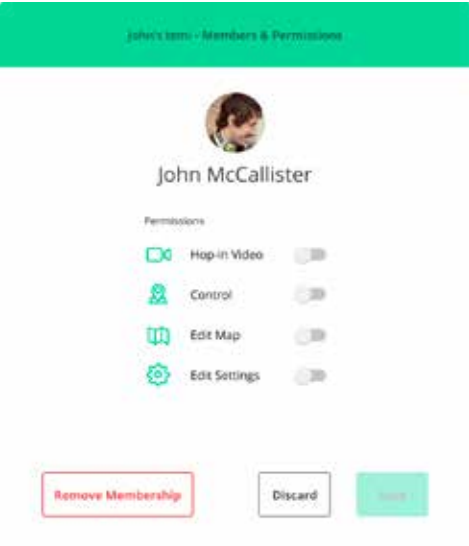

To view, assign and edit permissions to existing members of your robot, go to the “List of assigned members” on the page where you will see the name of the members, and the permissions assigned them. Owners can assign four types of permissions:

	Permission to call into <i>temi</i>
	Permission to control <i>temi</i>
	Permission to edit <i>temi</i> 's map
	Permission to edit <i>temi</i> 's settings

Click either the Permission icons, or the Edit button to allow or deny access to the member.

To remove membership, click the Edit button, and select “Remove Membership”

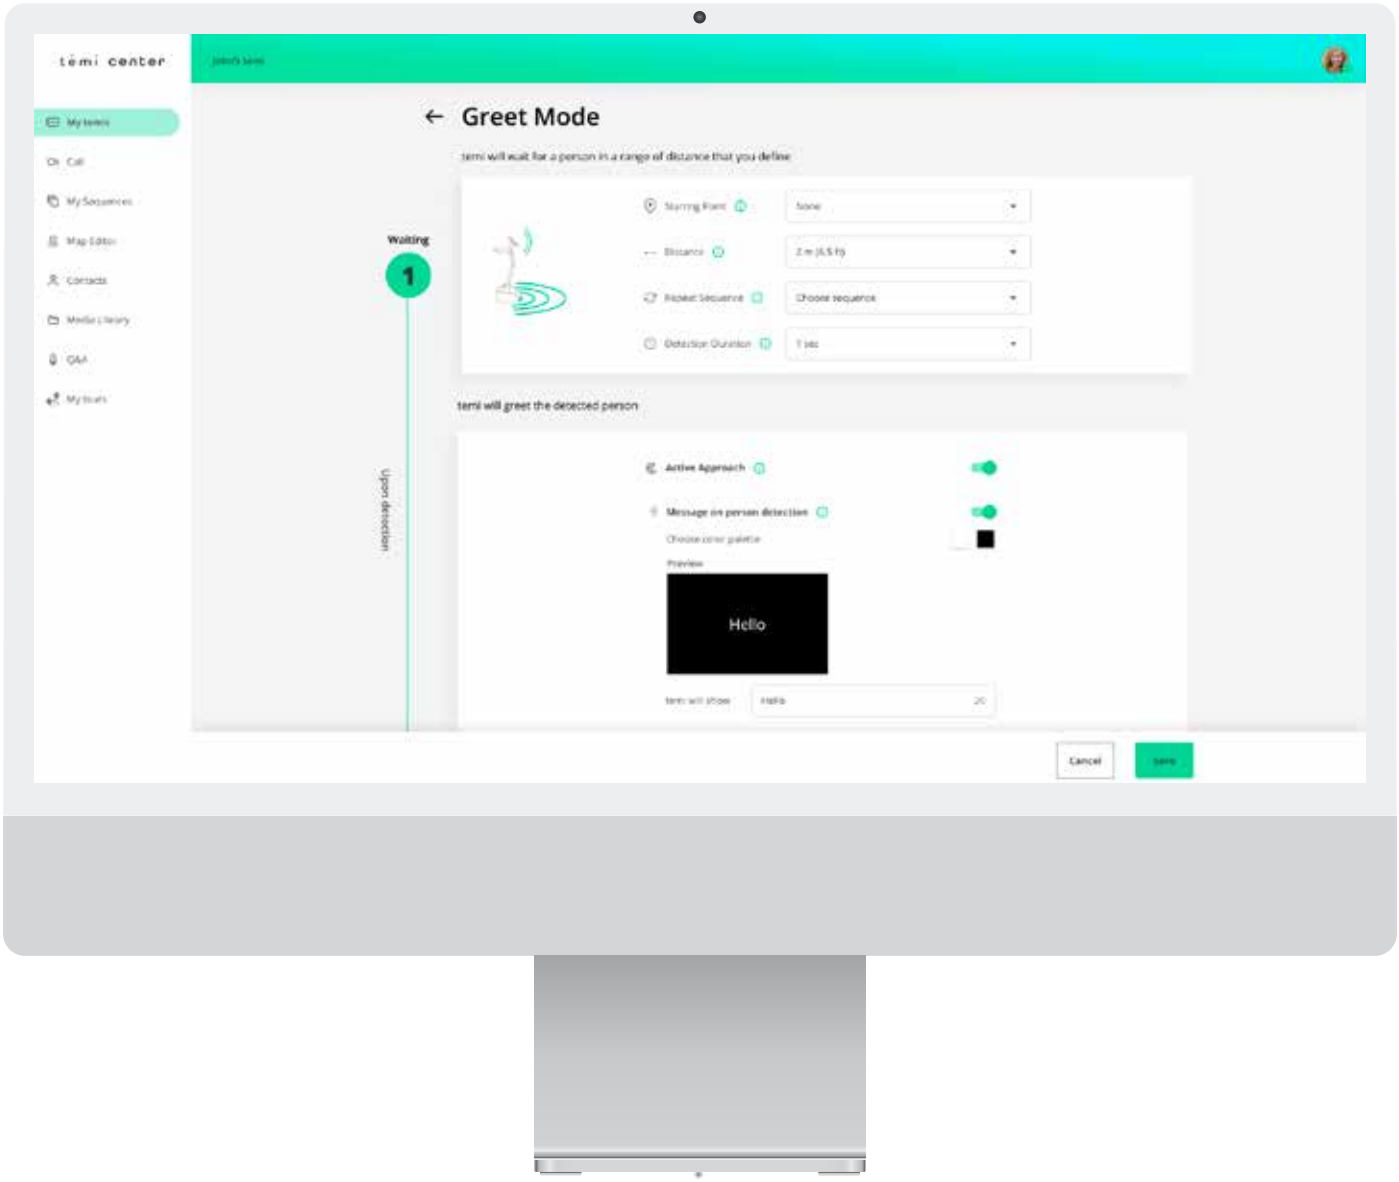

# Modes

Select between “Default”, “Privacy”, and Greet” modes for temi as it turns on.

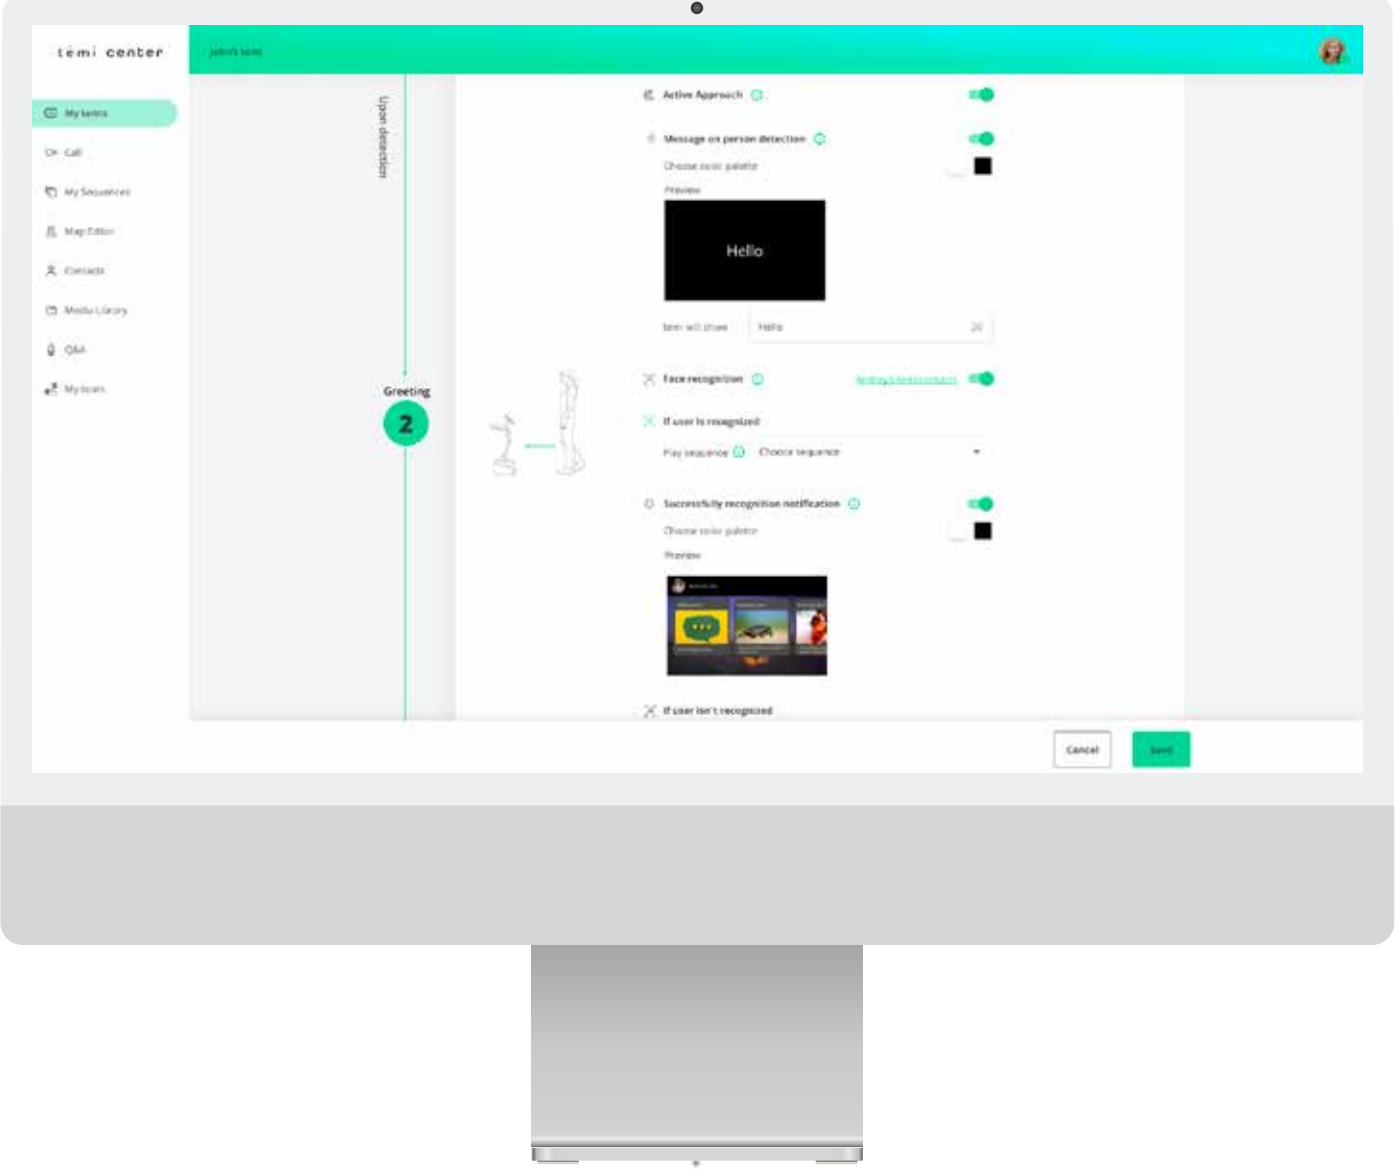

Selecting “Greet” mode will open a setting page of the four steps you will need to customize:  
1. Looking for a person

Step 1 lets you define the distance in which temi will try to look for a person, and how long the detection will continue. You can also add a Sequence to this step by selecting “Add New Sequence”

## 2.Upon detection

When a person is detected, you can customize temi’s actions. If you select to turn off Face recognition, temi will interact with the person in front of it by playing a Sequence you choose, or by simply moving on to the next step. You can have temi display a message on the screen when a person has been detected. You can now choose to have temi approach the user when they have been detected by toggling the Active Approach. (NEW

If you select to turn on your Face Recognition, you will be able to define a different type of interaction for recognized contacts and unrecognized persons. You can add a Sequence to this step once the contact has been recognized. In addition, if the contact cannot be recognized you can add a Sequence to play accordingly.

Please remember that in order to use the Face Recognition feature, you will first need to define a group of contacts under the Contacts page and make sure you upload a clear picture of the person’s face for temi to be able to recognize it. See more details under the Contacts section below.

*By enabling the facial recognition feature and uploading photos of individuals for facial recognition you acknowledge and agree that (i) you are sharing the uploaded photo, and any other personal information in connection therewith, with us for the purposes of enabling and using the facial recognition feature and (ii) you have obtained consent from all individuals that appear in the uploaded photos to use such photos and other personal information for the purposes of facial recognition in connection with the temi product.*

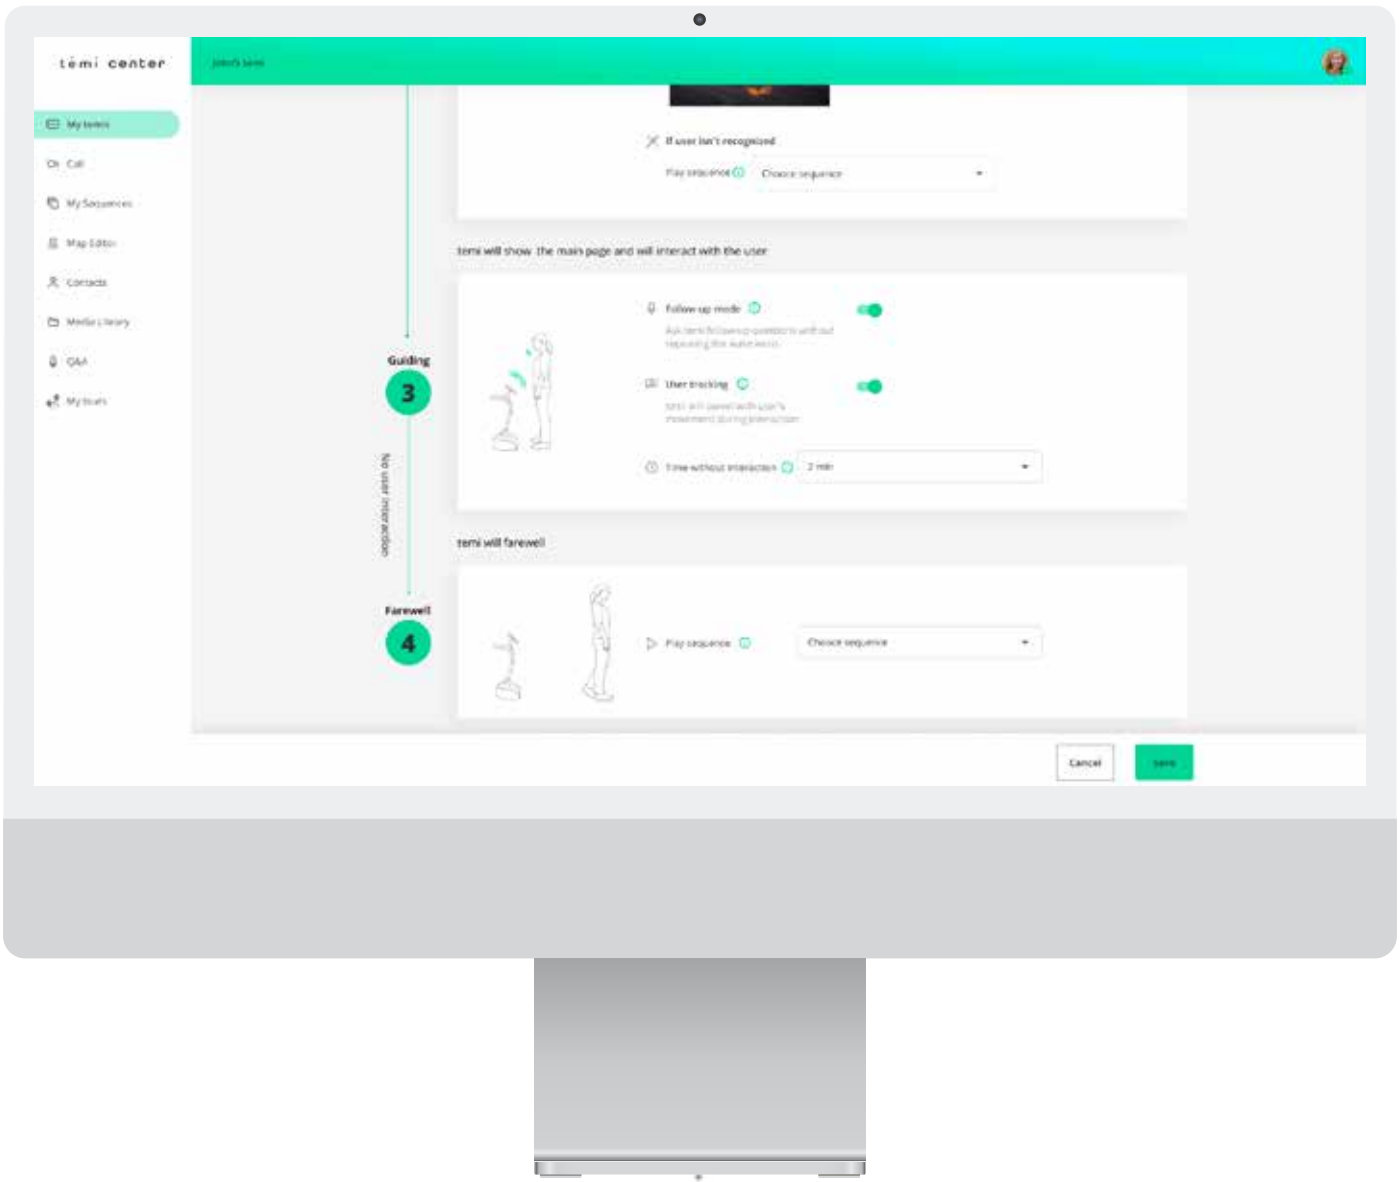

## 3. During Interaction

Step 3 allows you to define temi’s interaction with the person in front of it.

By selecting “Follow Up Mode” the person can ask temi a question without using the wake words “Hey temi”. By selecting User Tracking, temi will swivel with the user’s movement during interaction. You can also define the time-out period of no interaction. (Max: 10 mins)

## 4. Ending Interaction

Step 4 lets you customize temi’s actions after an interaction. You can select a Sequence for temi to play.

[Back to index](#)

# Sequence Scheduler

The Sequence Scheduler allows you to set a specific time for one of your Sequences to play.

On the Sequence Schedule page, select New Schedule

A pop-up window will appear where you can select which of your existing Sequences you would like to schedule and set up the exact date and time for it to start playing. You can also set your schedule to repeat.

You can choose the action you wish temi to complete at a specific date and time

- Run sequence - Create or Select from a sequence.
- Start Greet mode - temi will start Greet Mode
- Start Default mode - temi will set to default mode
- Start Privacy mode - temi will be set as a privacy mode

- Choose a tour Language - You can select from any of the 16 Languages available.
- Choose location - Select the first location of the tour.

### Tour

1. At the Location - Select or create a new sequence to play once the tour begins. You can also select a Q&A to test for this location.
2. + Add Location (Optional) - Choose a location.
  - a) While going to the next location - Select or create a new sequence to play while it drives from the start location to this location created.
  - b) At the Location - Select or create a new sequence to play once the tour begins. You can also select a Q&A to test for this location.

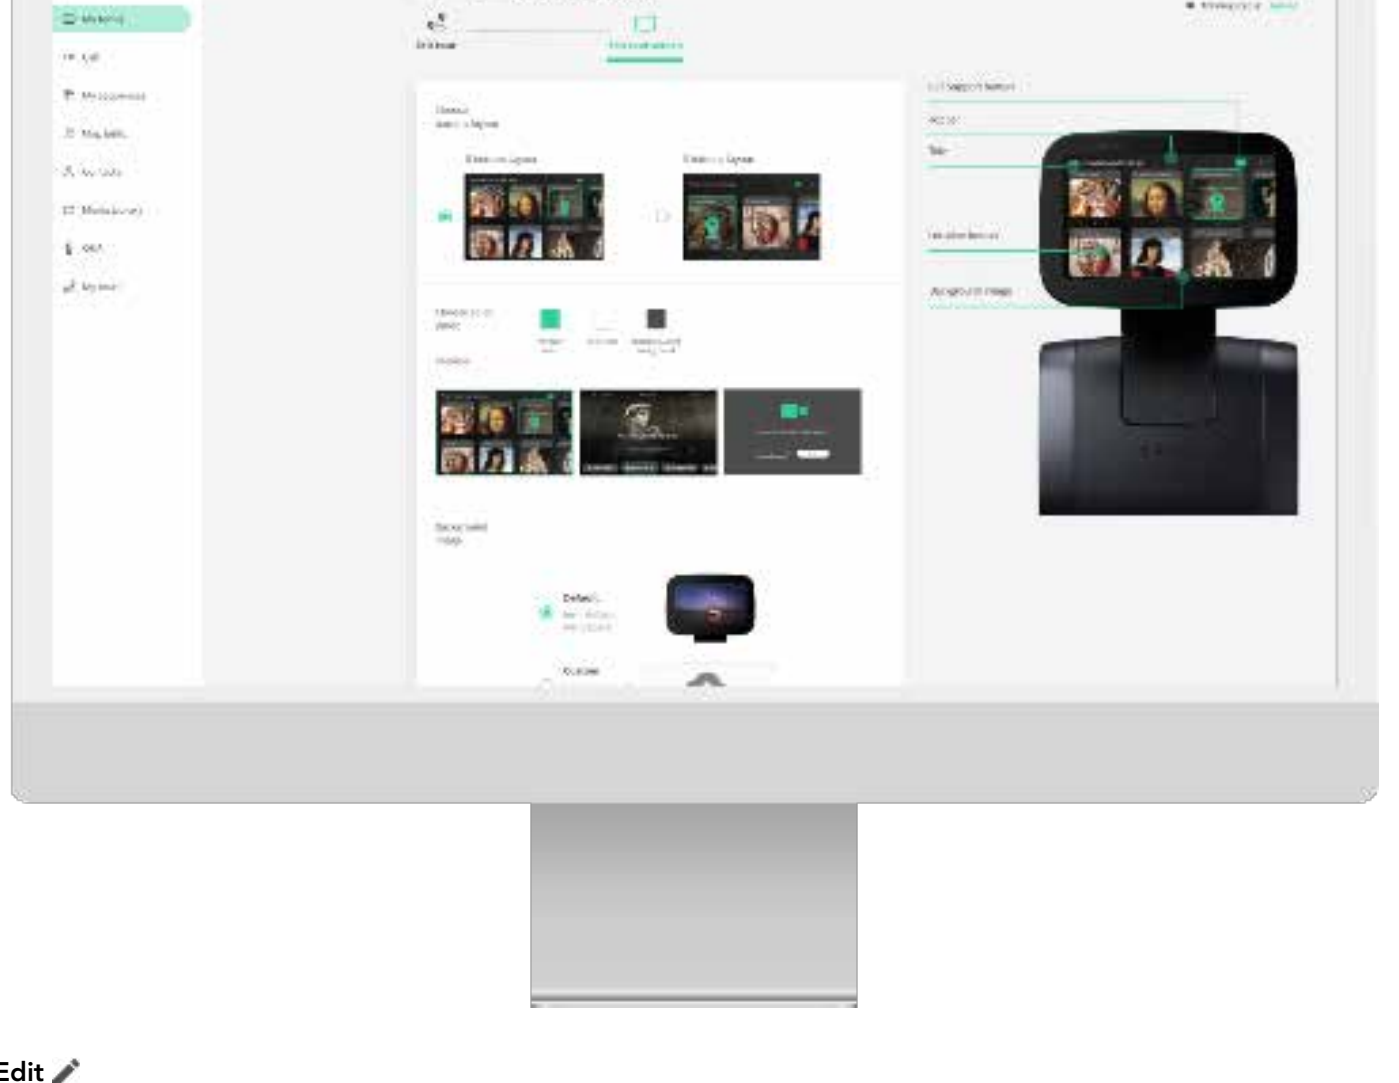

### Tour Settings

3. Tour Brief - Introduce the tour before it begins, you can display, explain or give a brief description of the tour. Select or create a sequence to do so.
4. Starting point - Select from the tour starting location, nearest location, or anywhere. (Note: If choosing "tour start location" temi will start the tour from the location that was added to the tour in step 2).
5. Auto continues to next location - Toggle ON or OFF for the tour to continue on the next location. If toggled ON, the max time is 10 min.
6. End tour
  - a) Select a time before the tour ending notification displays. (Max: 10 min)
  - b) Select or create a farewell Sequence to end the tour.

### Edit Tour Screen

If you wish to customize your Tour Screen you can do so by clicking "Edit Tour Screen".

- Choose Button layouts – Select from 2 different options how many tour buttons you wish your temi to display. (3 or 8 layouts)
- Color Palette– Choose from the color palette which colors you wish the Call support button, Topbar, Tour title, and Location Button to display.
- Background image– Select Default or Add a custom image that will appear in the background.
- Support Button- Choose to enable or disable the Video call icon, if toggled on you can select which contact will be called and edit the name to display on the temi screen.
- Alerts - Display a message alerting the user(s) of the tour ending by typing a message to display on the temi screen.
- Tour Locations Appearance - Customize the name and appearance of the button.
  - a) Name – Add a line of text to distinguish the Function Button
  - b) Background - Upload an Image file or choose from the media library

### Edit

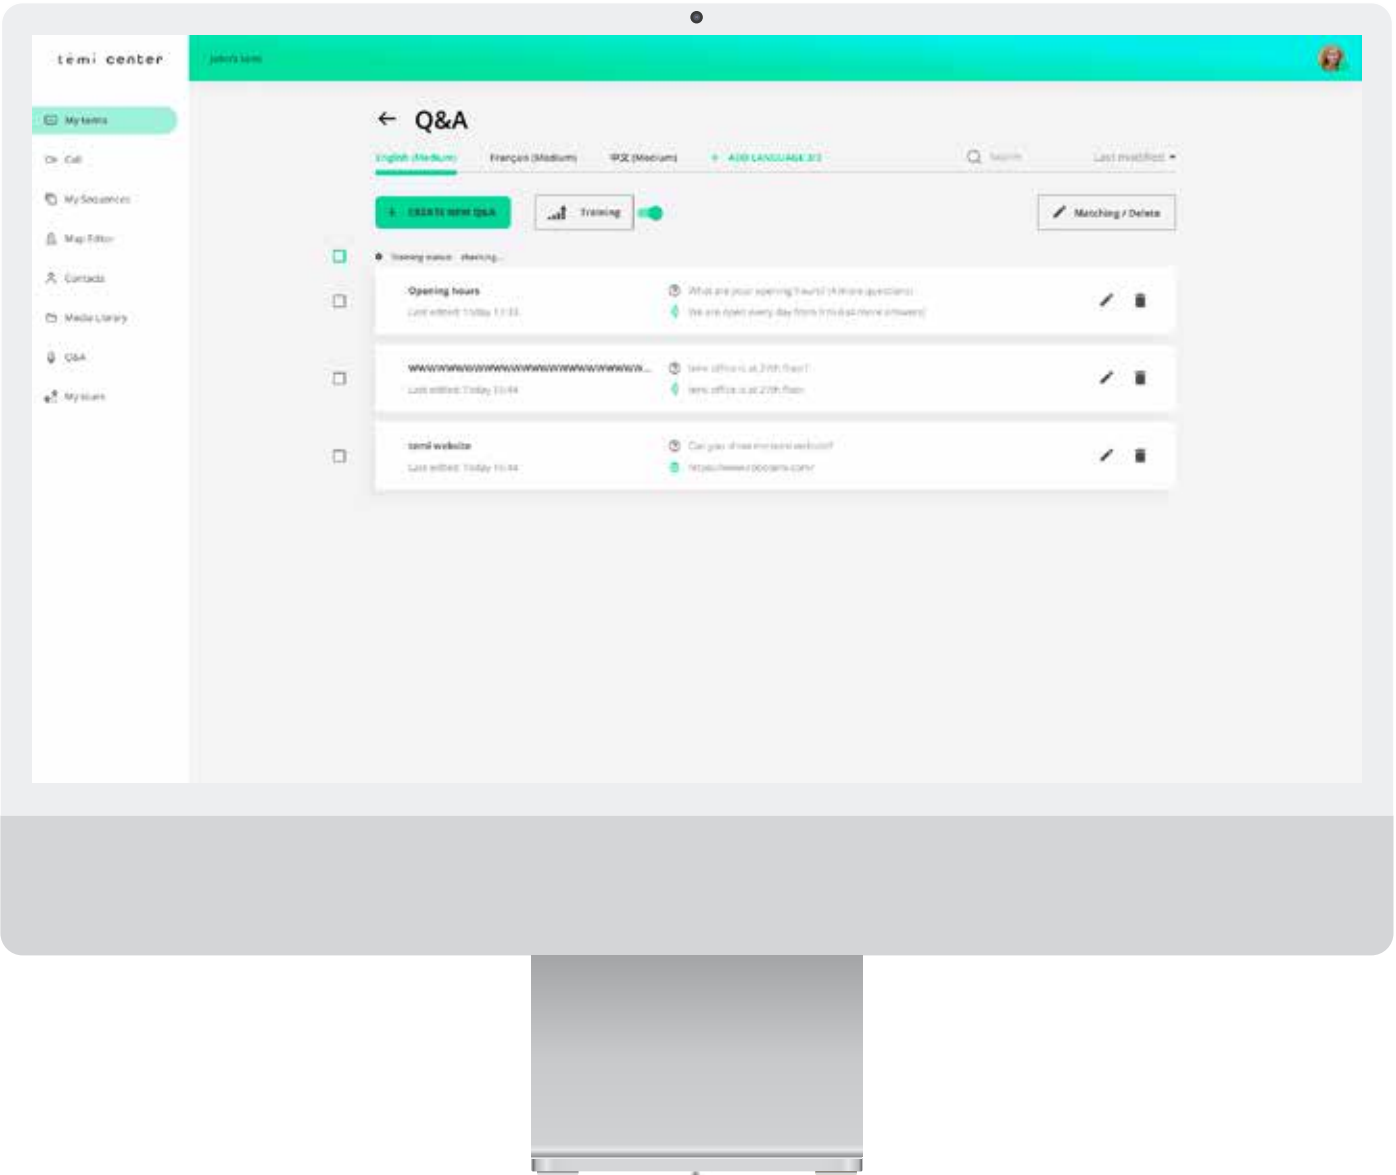

- a) Name – Input title of the Tour.
- b) Description – Add a line of text describing the Tour.
- c) Tags - Input a tag that will help find the specific tour.
- d) Upload & Media Library – Upload an Image file or choose from the media library

**Duplicate** Choose to duplicate a tour guide.

**Delete** Delete the Tour Guide of your choosing.

# Q&A

Selecting “Create new Q&A” will open a setting page of the steps you will need to create one

Add language (max 3 languages can be added)

Language

Choose language

Matching confidence ⓘ

Choose level

Low (Matching Confidence 75%)

Medium (Matching Confidence 85%) Recommended ✓

High (Matching Confidence 95%)

Update “Add language” image

- 1) Q&A name: Input your Q&A name
- 2) Question: Input your question(s)
- 3) Answer: There are 3 options that can be set as the answer which are by Sequence, Speech or Launching an App.

a) Sequence: You can choose a sequence or add a new sequence.

b) Speech: Input temi's answer.

c) Launch an app: Select an App to launch.

d) Show URL: [Input a URL from a website of your choice.](#)

e) Start tour: [Select from a tour that you have created.](#)

**For Developers: Choose a Class name, a Key and a Value.**

**Training:** When toggle ON, temi’s AI assistant will save the users questions for you to improve the answers for the next time that question is asked.

**Note:** By clicking allow you agree that temi will save all the users questions for training purposes only and will be used for any other purpose.

**Matching / Delete:** Edit or delete the matching confidence of the language chosen.

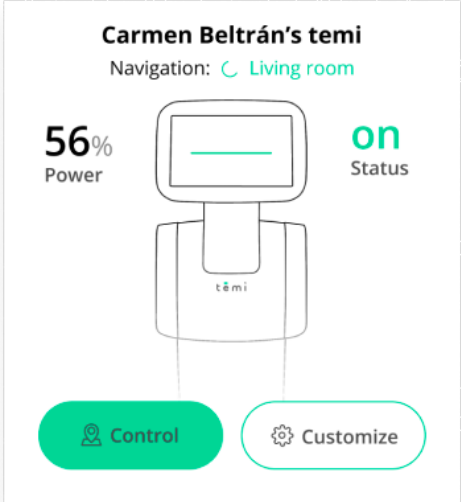

**Search:** Search the Q&A by the name

[Back to index](#)

# Control

To control your temi through the temi Center, tap “My temi” on the side menu. All the temis that you are the owner of and registered under your phone number will appear here.

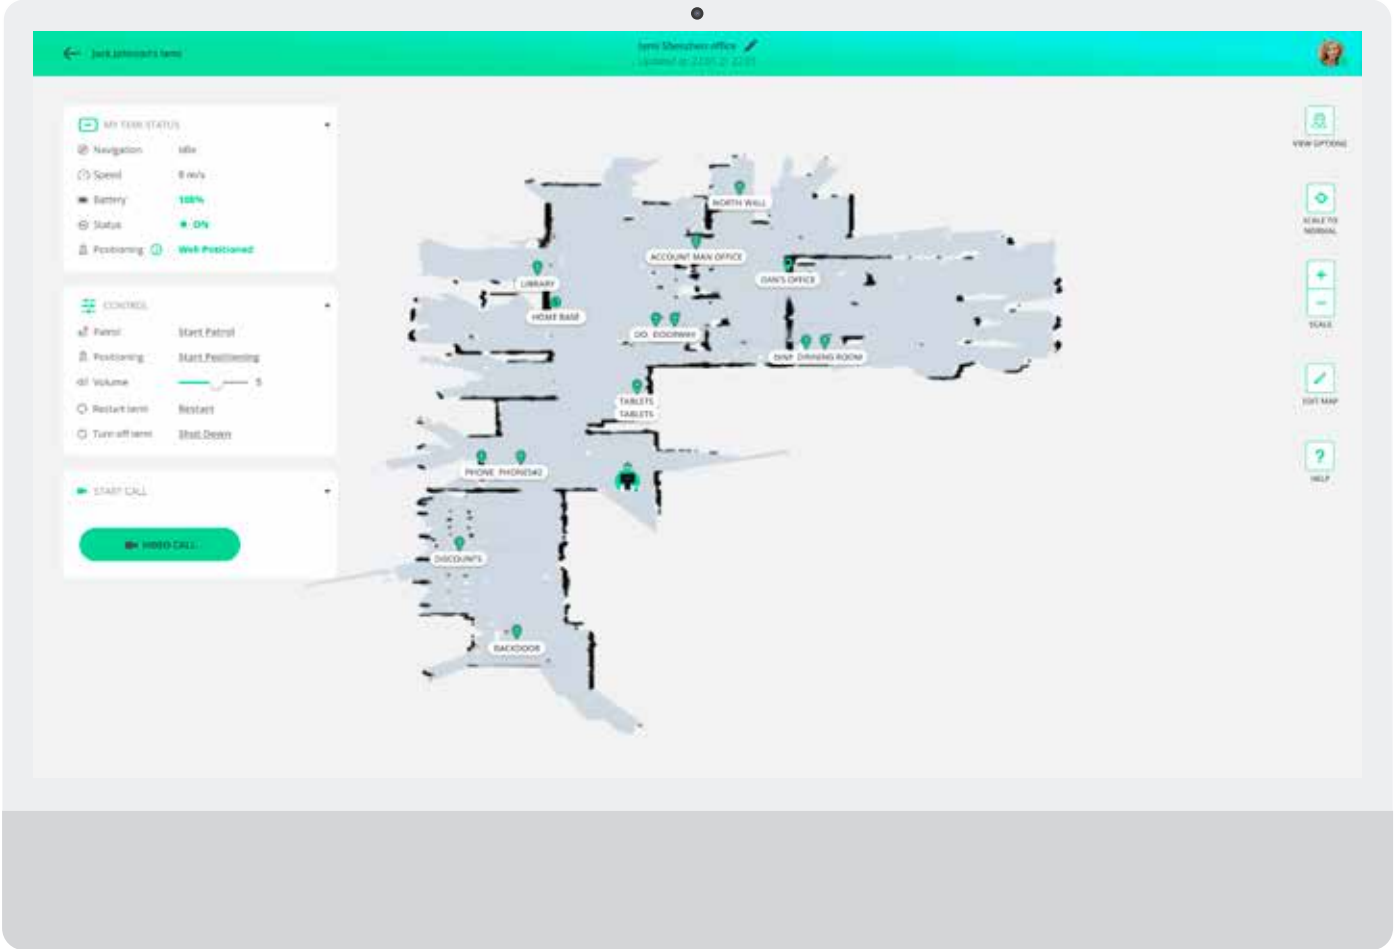

Select the temi you wish to control and press the “Control” button. The most up to date map will appear on your screen, as well as the status of your robot. The temi icon on the map, represents its current location.

On the left side of the screen, you will see three menu bars:

1. My temi status – see the overall status of your robot, including speed, battery and positioning
2. Control – Using this menu lets you control certain functions of temi via the temi Center:
  - Patrol: set temi to go to each location in a continuous loop
  - Positioning – you can initiate a Positioning to allow the robot to re-align itself with the map
  - Volume – Turn temi’s volume up or down
  - Restart temi
  - Turn off temi
3. Start a video call

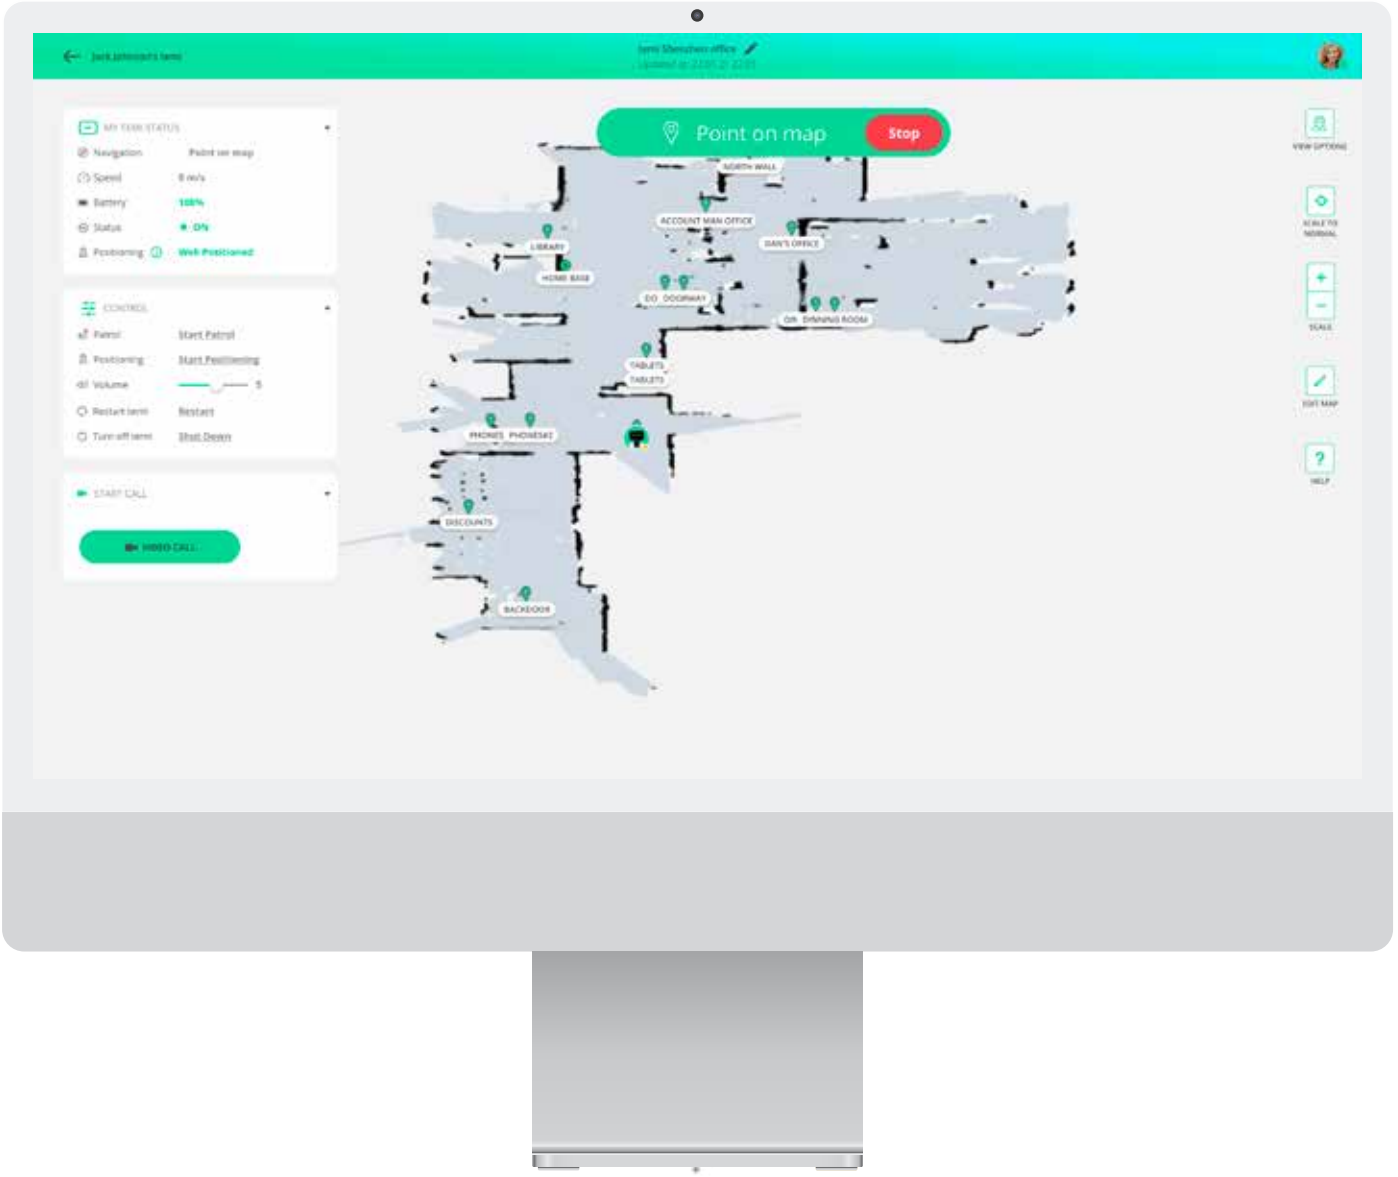

You can change the view of your map to see your locations, paths and virtual walls. Tap the “VIEW OPTIONS” on the right menu and select which items you would like to add to your view.

Use the “Scale” buttons to zoom in and out.

To send temi to an existing location, simply tap the desired location on your map. The temi icon will move accordingly to indicate the robot's location as it makes its way to the location.

In addition, you can tap anywhere on your map and temi will go there, even without a saved location.

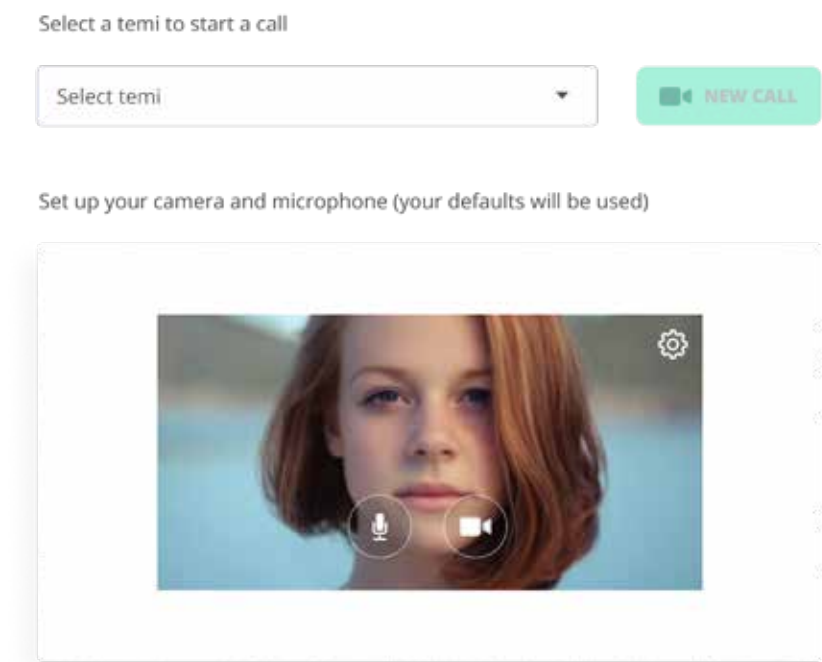

You can also edit your map by selecting the “Edit Map” button.

The Edit Map in Control mode will allow you to add locations, Paths and Virtual Walls outside the Map Editor. When you are done editing your map, don't forget to back it up to save all your changes by selecting “Back Up Map” in the bottom control bar.

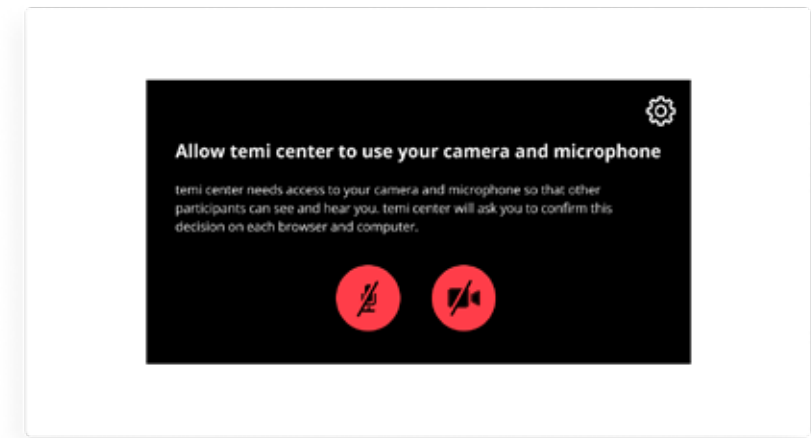

# Call

The Call screen lets you connect to your robot directly from the temi Center. To make a video, simply select the robot you wish to call and press New Call.

## Call

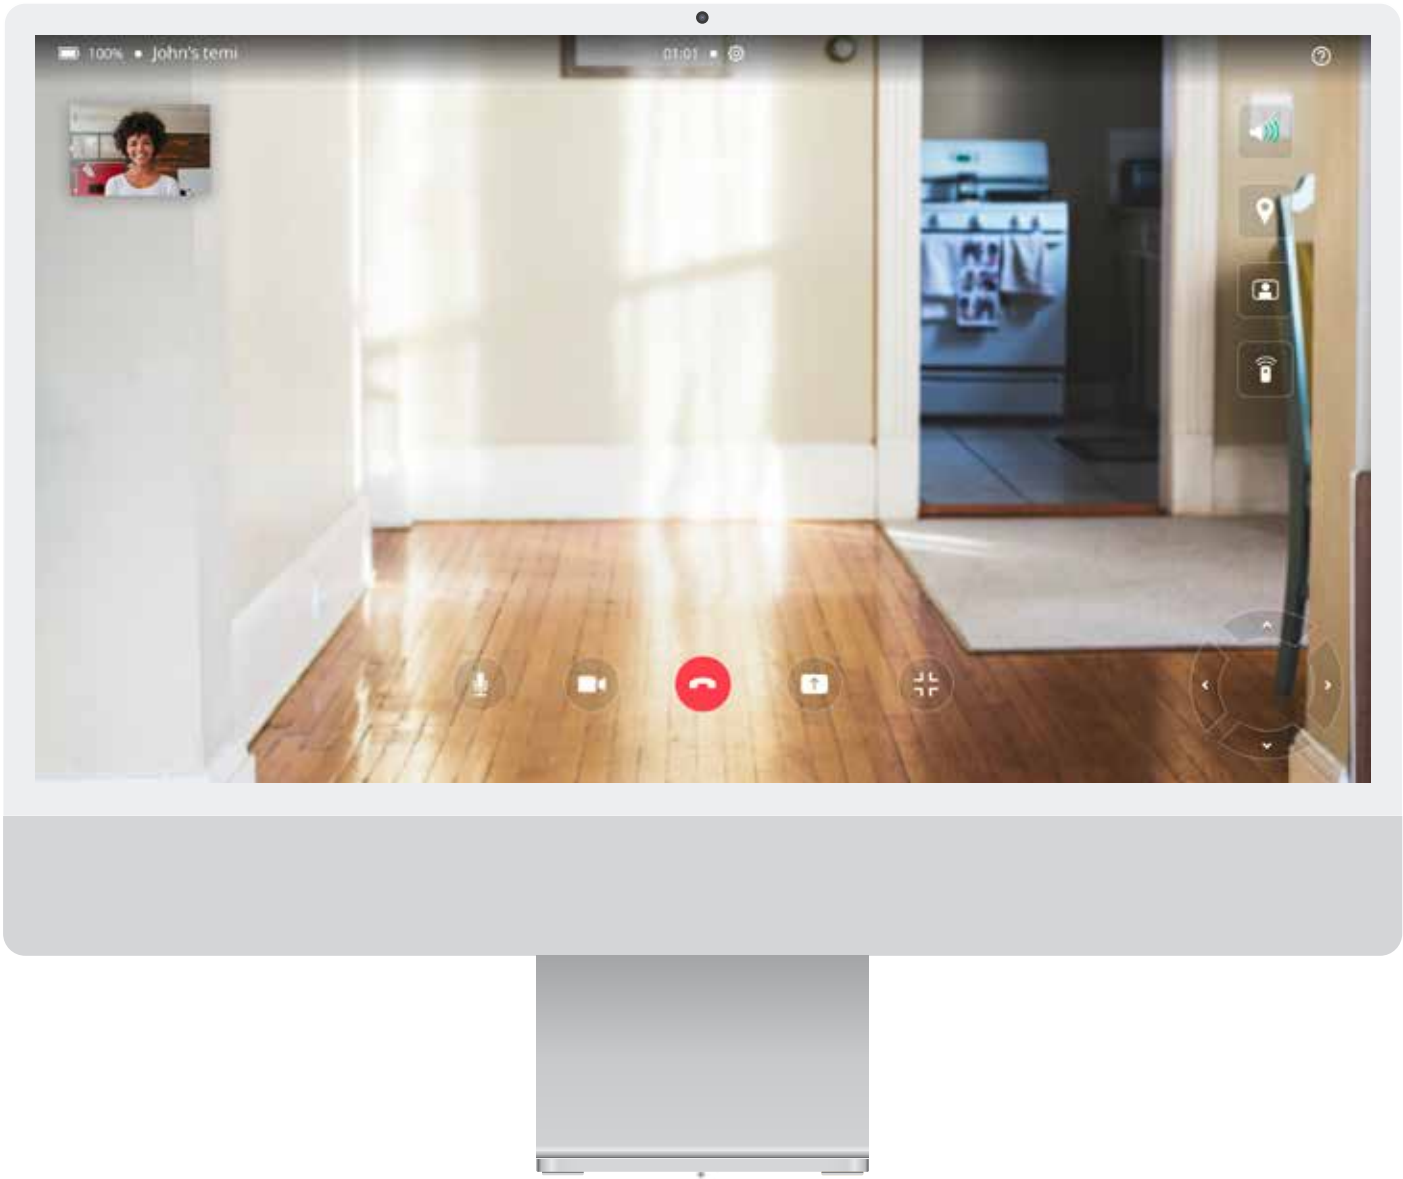

Please note that you might be required to set up your microphone and camera.

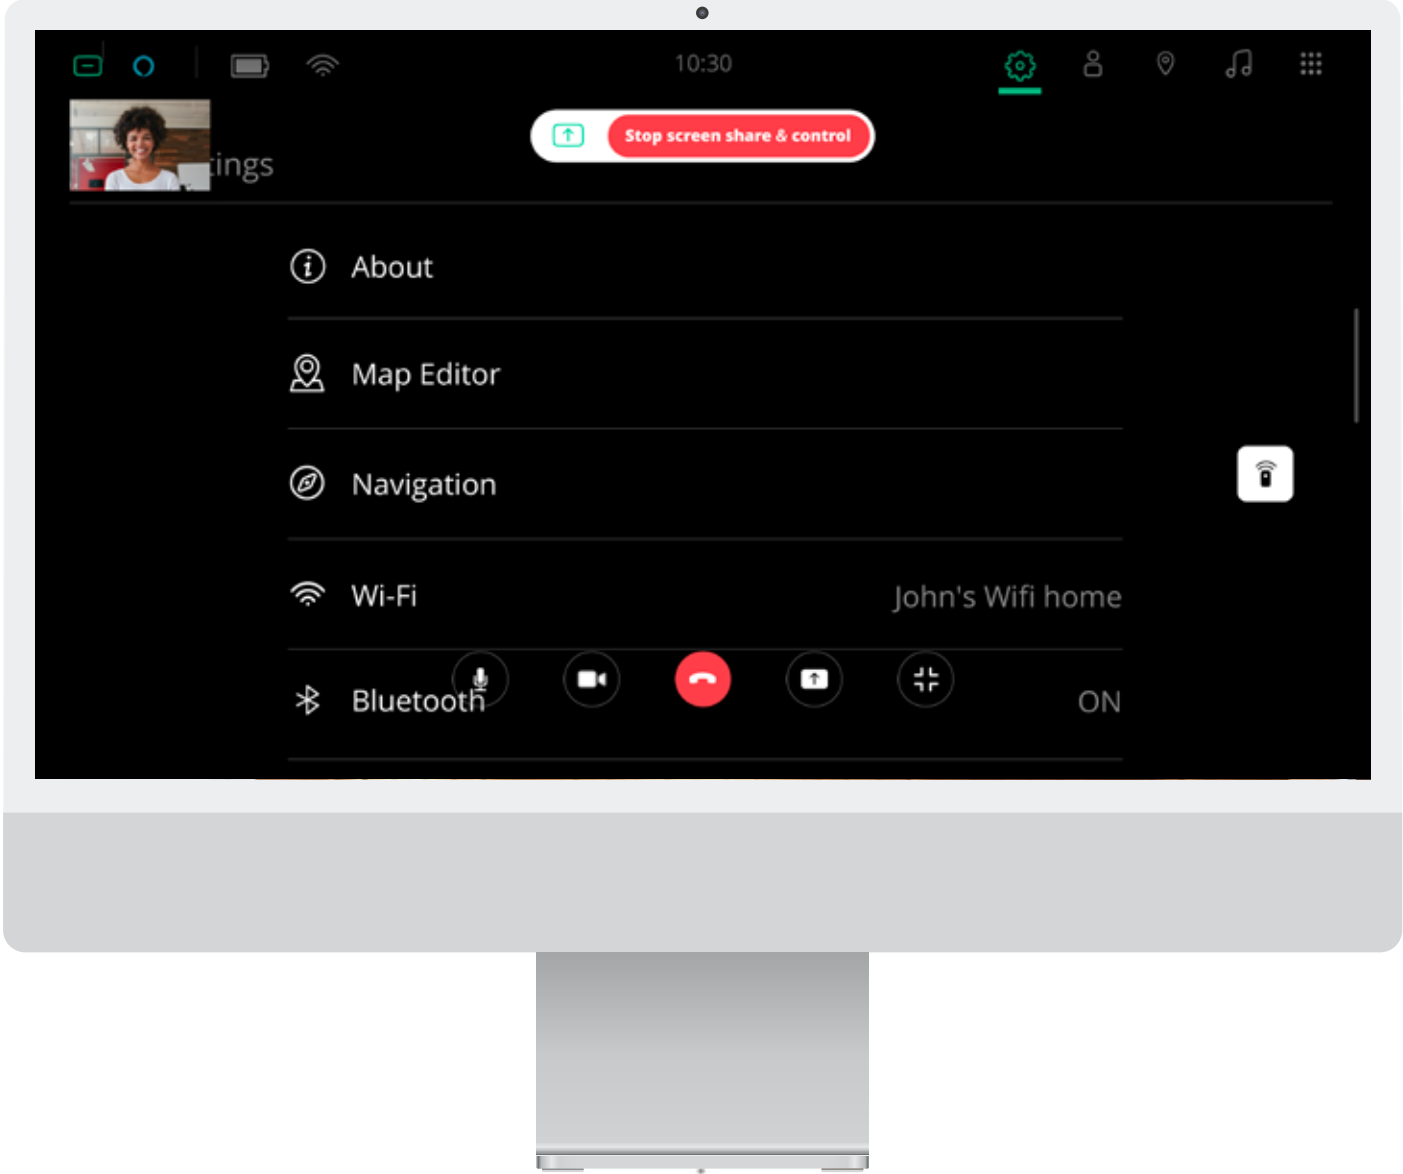

If you receive this message on your call screen, please check settings and permissions of your browser.

When you are calling a temi from the temi Center, you can move and control it:

- Move - Move temi around by using the arrows on the screen or by using your mouse scroll or touch pad.
- Volume – Control the volume of your temi.
- Follow – Switch temi to Follow Mode to have it follow the person you are speaking with
- Locations – Send temi to set locations on the map
- Share Screen – Share the screen of your computer with the person you are speaking with
- Control the robot’s screen – access and control your robot’s interface through the temi Center
- Option to choose from 3 image sizes during a Telepresence call

# Map Editor

The Map Editor provides a convenient editing tool to make changes to your saved maps and increase temi's navigation capabilities. The Map Editor will allow you to add locations, "Paths" and "Virtual Walls". To access the Map Editor, select Editors > Map on the side menu of temi Center. First, on the Map Editor page, select "Import map" to import a map from a specific temi to temi center, so you can start editing. Allow your map a few second to load, until it appears on the screen. At any time, you can select the map you want to edit out of your saved map. If you see saved maps you no longer need, you are welcome to delete them.

To begin editing your map, turn to Editor buttons at the bottom of the page.

### Add a "Virtual Wall"

A "Virtual Wall" is an invisible barrier to block temi from getting into specific areas. We recommend you add Virtual Walls near staircases, steep drops, or glass walls. To start, click the "Add Virtual Wall" button at the bottom of the page. Begin by marking a point on the map of where you would like the "Virtual wall" to begin. Continue marking points on the map until your Virtual Wall is created. When you're finished, hit "Save" to save the changes.

### Add Locations

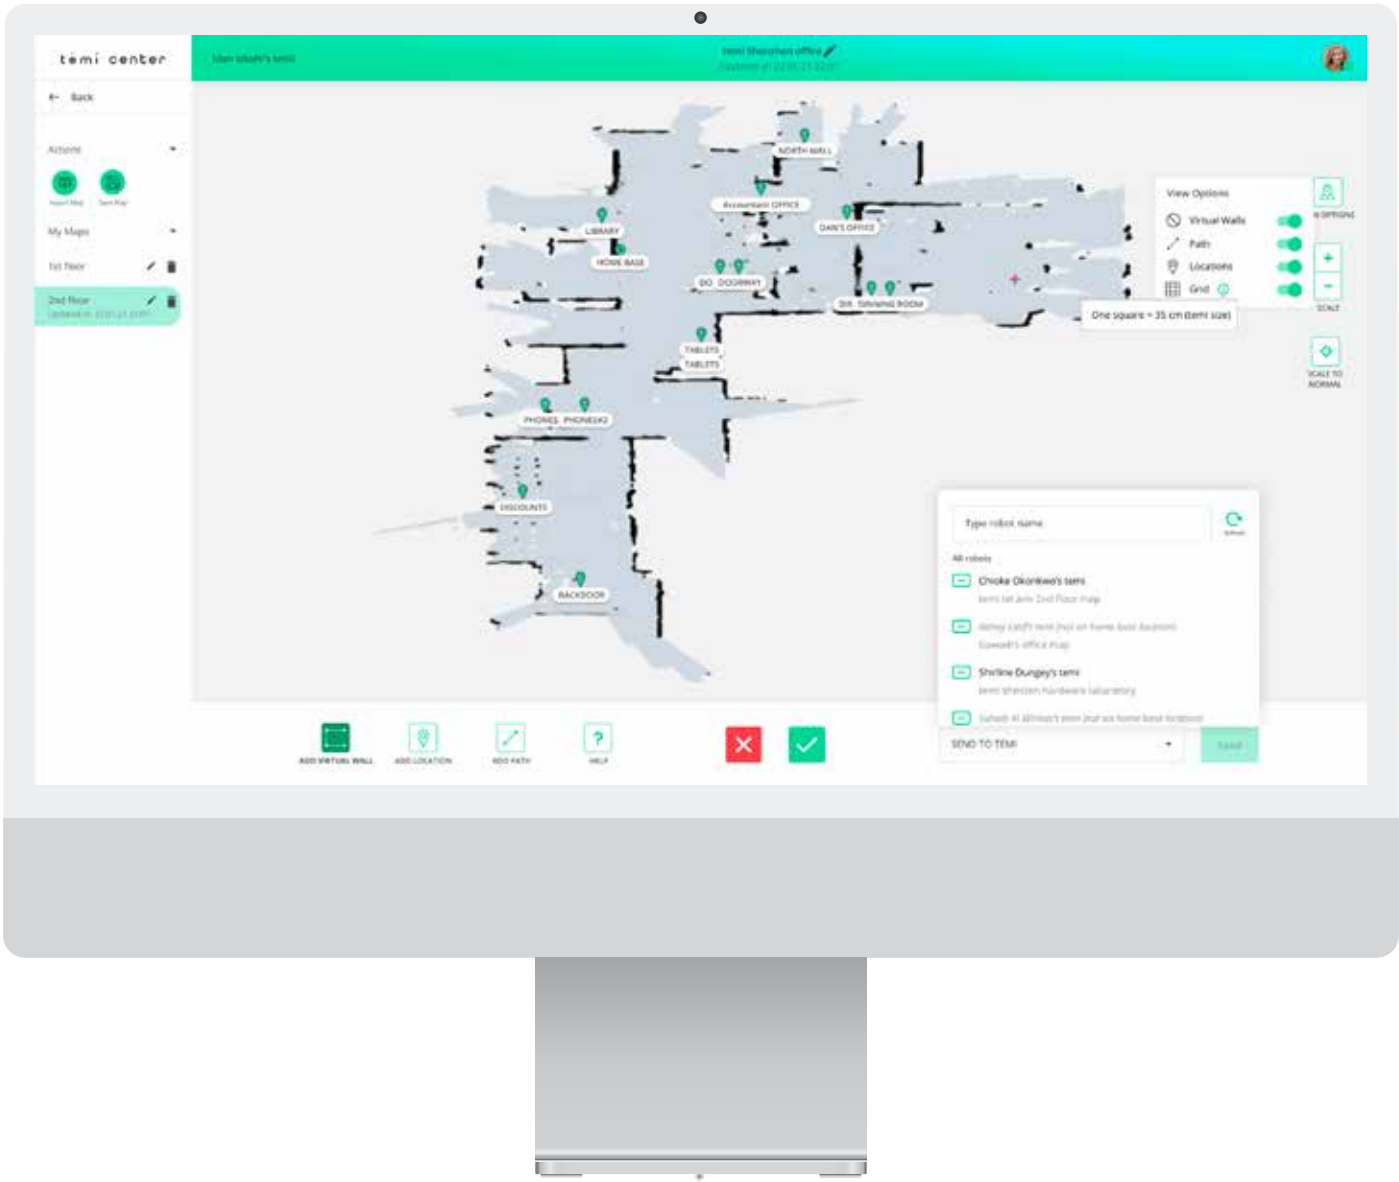

To add a location, simply press on the point on the map where you want your location to be saved. Please note that new locations can only be set inside an existing map. If you would like to set a location outside your map, please return to the robot's map editor and use the "Continue Mapping" option.

### Add Path

A Path will enable you to guide temi through the best and most efficient route from one destination to the other. Although temi is capable of navigating without it, a Path will ensure a smoother navigation experience. To start, click the "Add Path" button at the bottom of the page. Begin by marking a point on the map of where you would like the path to begin. Continue marking points until you reach the desired destination. When you are finished, hit "Save" to save the changes.

### Updating your Temi:

When you are finished editing your map, click "Send to Robot" at the bottom of the page. Select the robot you wish to update, and press "Send". Your updated map will be sent to that temi.

# Contacts

Create or import contacts to your temi and create contact groups. Create a new contact

ADD CONTACTS

From contacts

New contact

Once a contact has been added, you can edit the contact details by clicking the Edit button on the right. This will open the Edit Contact window.

When you enter your contact’s phone number, you will receive an indication of whether or not that contact is also a temi user. Please note that a contact does not have to be a temi user to be added on temi Center, however, you will not be able to call this person through your temi robot.

After verifying the phone number, you can continue to add or edit the person’s details, as well as add photos for the Face Recognition feature of the Greet Mode (see Customize > Modes above).

By enabling the facial recognition feature and uploading photos of individuals for facial recognition you acknowledge and agree that (i) you are sharing the uploaded photo, and any other personal information in connection therewith, with us for the purposes of enabling and using the facial recognition feature and (ii) you have obtained consent from all individuals that appear in the uploaded photos to use such photos and other personal information for the purposes of facial recognition in connection with the temi product.

# General Settings

## About

- 1. Software Update – check if your software is up to date and set up your Auto Update settings
- 2. Product information – see your robot's serial number and software versions
- 3. Applications – See all the apps that are currently downloaded on your temi

## Password and Security

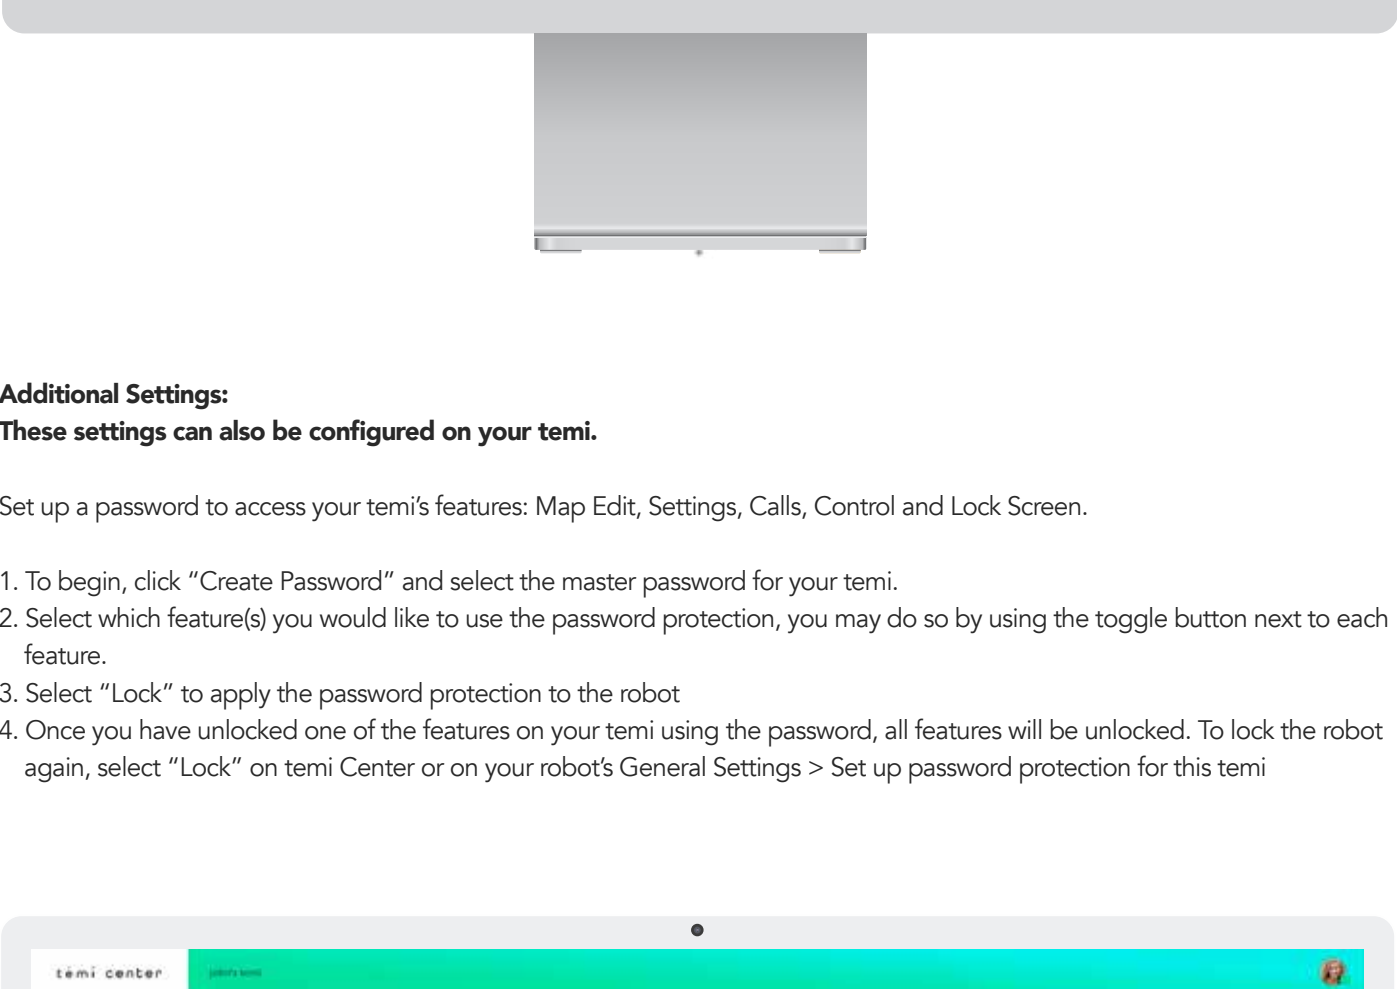

Set up a password to access your temi's features: Map Edit, Settings, Calls, Control and Lock Screen.

- 1. To begin, click "Create Password" and select the master password for your temi.
- 2. Select which feature(s) you would like to use the password protection, you may do so by using the toggle button next to each feature.
- 3. Select "Lock" to apply the password protection to the robot
- 4. Once you have unlocked one of the features on your temi using the password, all features will be unlocked. To lock the robot again, select "Lock" on temi Center or on your robot's General Settings > Set up password protection for this temi

Set up password protection for this temi

Please note, the "master password" can only be created and set on the temi Center. The password protection settings will not appear on your robot until the master password has been set.

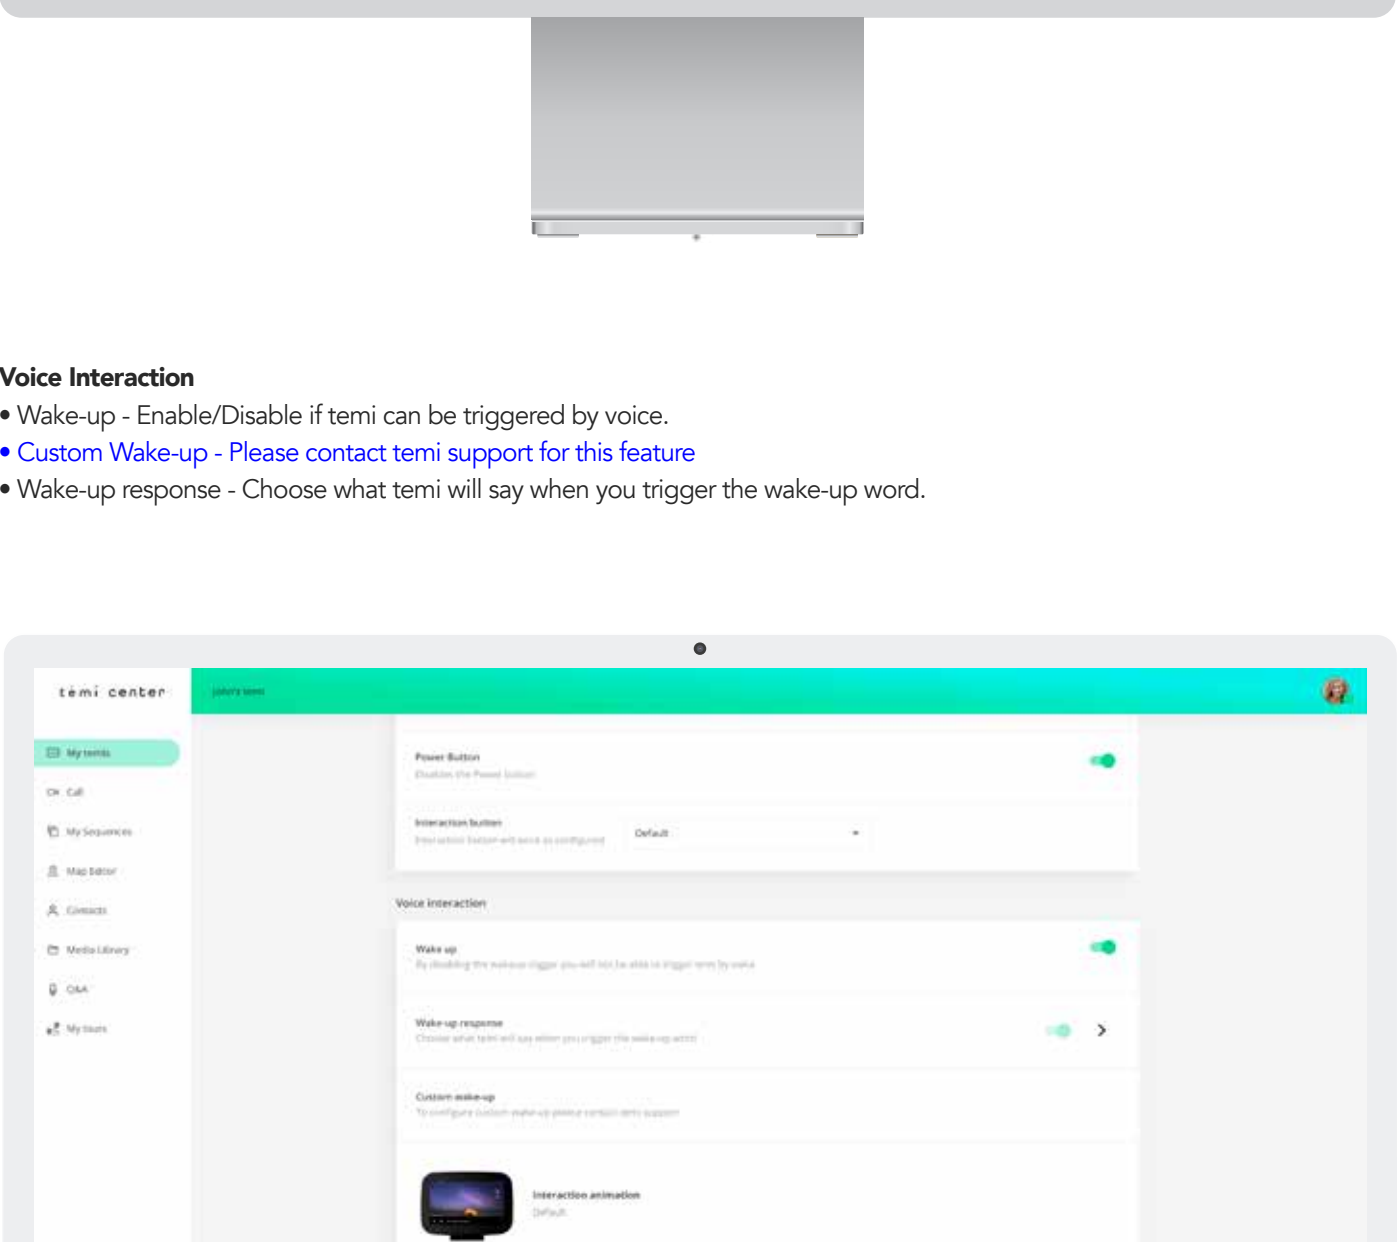

## Additional Settings:

These settings can also be configured on your temi.

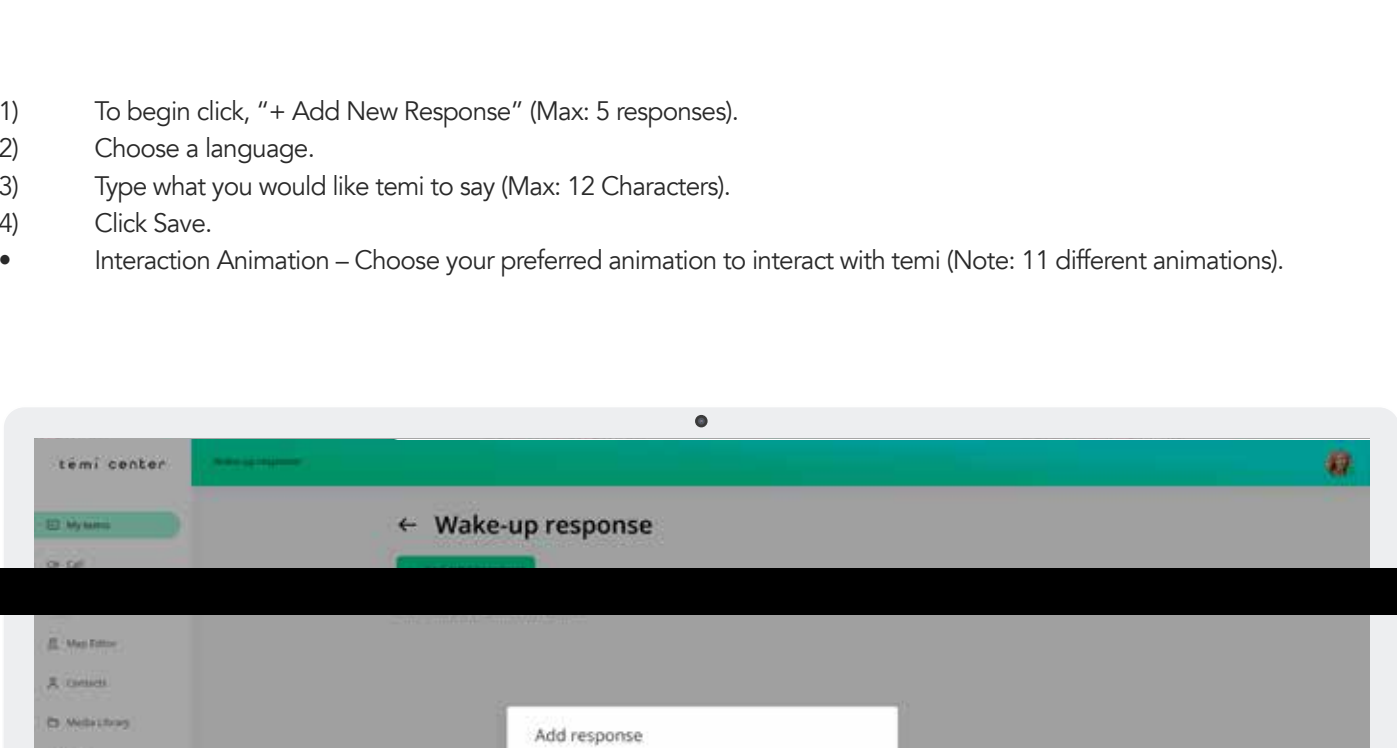

Set up a password to access your temi's features: Map Edit, Settings, Calls, Control and Lock Screen.

- 1. To begin, click "Create Password" and select the master password for your temi.
- 2. Select which feature(s) you would like to use the password protection, you may do so by using the toggle button next to each feature.
- 3. Select "Lock" to apply the password protection to the robot
- 4. Once you have unlocked one of the features on your temi using the password, all features will be unlocked. To lock the robot again, select "Lock" on temi Center or on your robot's General Settings > Set up password protection for this temi

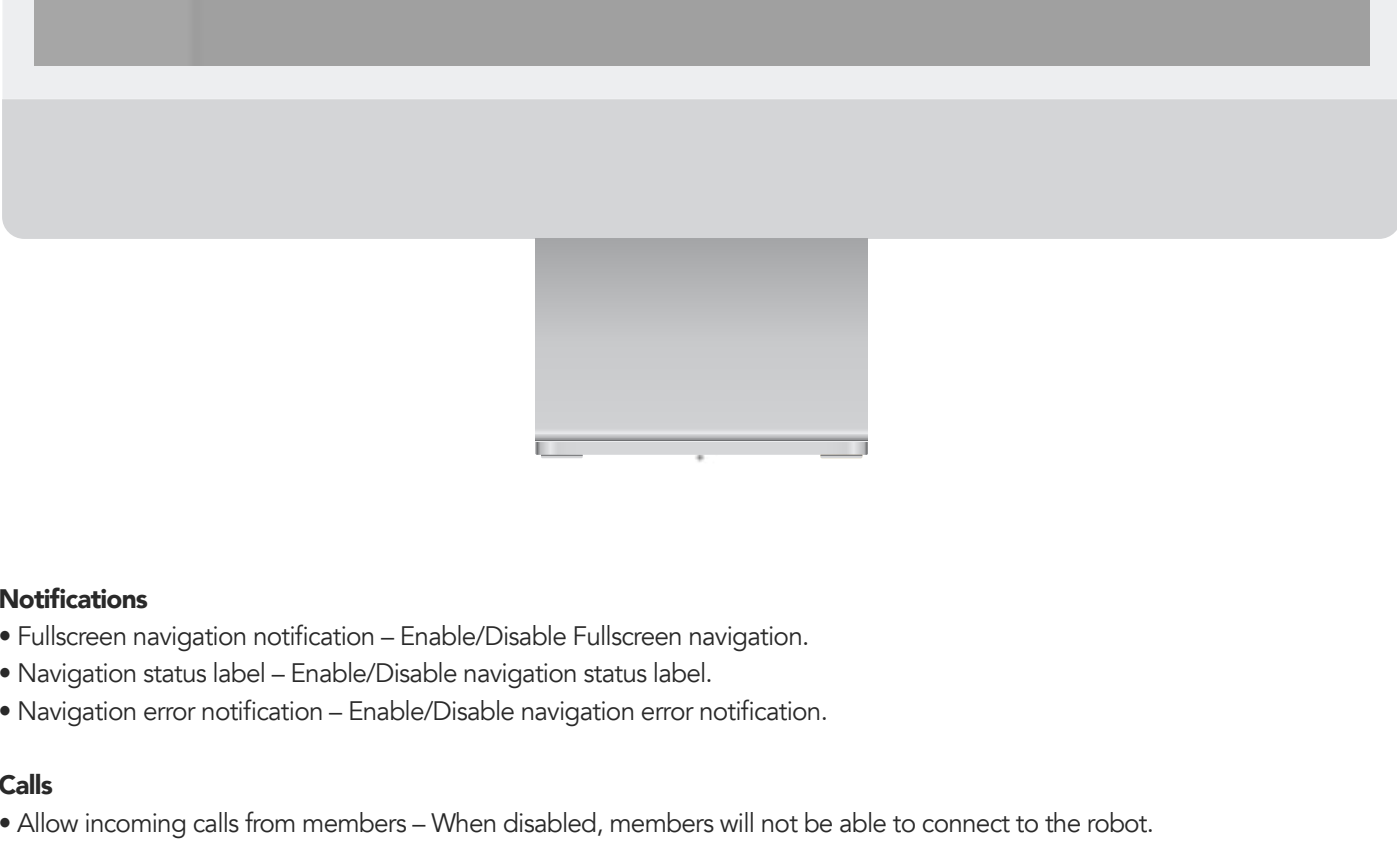

## Voice Interaction

- Wake-up - Enable/Disable if temi can be triggered by voice.
- Custom Wake-up - Please contact temi support for this feature
- Wake-up response - Choose what temi will say when you trigger the wake-up word.

- 1) To begin click, "+ Add New Response" (Max: 5 responses).
- 2) Choose a language.
- 3) Type what you would like temi to say (Max: 12 Characters).
- 4) Click Save.
- Interaction Animation – Choose your preferred animation to interact with temi (Note: 11 different animations).

## Notifications

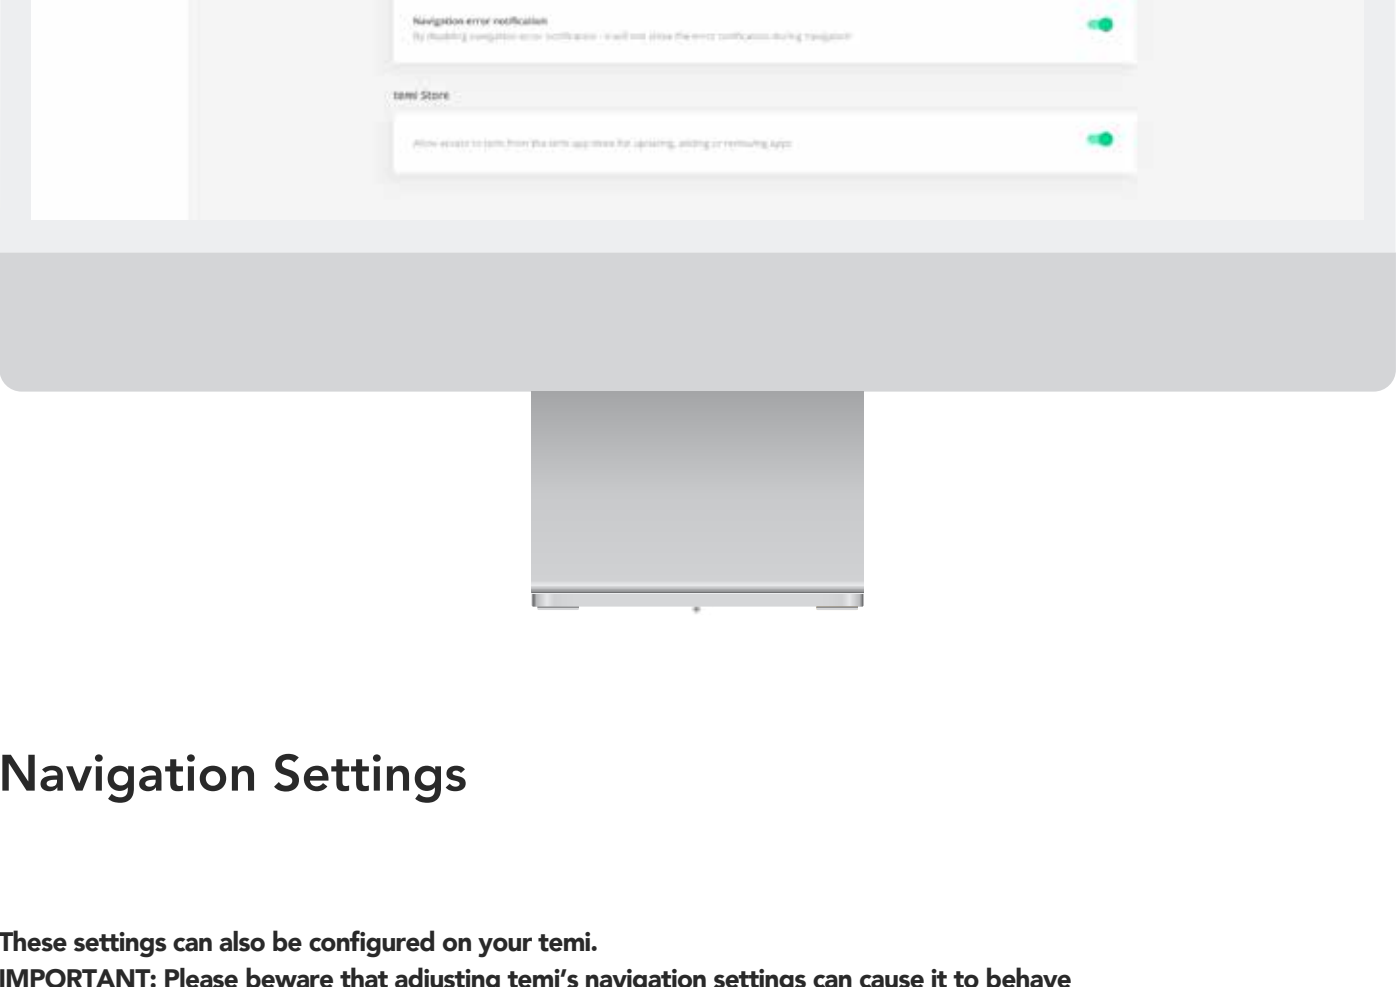

- Fullscreen navigation notification – Enable/Disable Fullscreen navigation.
- Navigation status label – Enable/Disable navigation status label.
- Navigation error notification – Enable/Disable navigation error notification.

**Calls**

- Allow incoming calls from members – When disabled, members will not be able to connect to the robot.
- Allow incoming calls from contacts – When disabled, contacts will not be able to connect to the robot.
- Allow contacts to control temi during a video call – When disabled, contacts will not be able to control temis actions during a video call.
- Firewall Mode – When toggled ON, temi will work on your networks firewall (Note: Contact support to receive the firewall whitelist)

## temi Store

- When toggled ON, access will be given to your temi to update, add or remove apps from the temi app store.

# Navigation Settings

These settings can also be configured on your temi.

**IMPORTANT: Please beware that adjusting temi's navigation settings can cause it to behave unexpectedly. It may fail to avoid obstacles, stairs and drops when not set up properly.**

- Positioning – It may not be aligned with the current map, use this function to realign it. You may be asked to do this by your robot, or you may choose to do so if you are experiencing navigation issues.
- Stop Follow mode on Virtual Walls – Your Virtual Walls can be either active or inactive in Follow mode. If you choose to inactivate Virtual Walls on Follow mode, your robot will continue to follow you and ignore the Virtual Wall.
- Home Base Position Verification – When toggled ON, if you place temi on the home base manually a prompt message will display asking if the position has been changed.
- "Go-to" Speed Control – Set the speed of temi's navigation to locations (Slow, Medium, High).
- Bypass Obstacles – Configure temi's behavior when facing an obstacle in its path.
- Navigation Timeout – Configure temi's timeout period when failing to navigate (Max: 3 mins).

## Sensors Settings

Configure the sensitivity of temi's obstacle avoidance that best fits the environment it is in. Ability to configure the Ground depth cliff detection, Ground depth, Head depth, Front TOF sensor and Back TOF sensor.
